EQUINOXES, SOLSTICE POINTS AND MOON PHASES

VERNAL EQUINOX

March 21

Day & night are equal

Noon sun is directly overhead at
Equator on its apparent travel north

SUMMER SOLSTICE

June 21

Longest day of year

Noon sun directly overhead
at approx. $23\frac{1}{2}^{\circ}$ N.Decl.

WINTER SOLSTICE

December 22

Shortest day of year

Noon sun directly overhead
at approx. $23\frac{1}{2}^{\circ}$ S.Decl.

AUTUMNAL EQUINOX

September 23

Day & night are equal

Noon sun is directly overhead at
Equator on its apparent travel south

TIME CHANGES IN THE U.S.A.

From the caveman's first awareness of natural cycles to the scientist's exploration of outer space today, man has been searching for his time-space orientation in the universe. At any point in history, we note that his search for knowledge has always been based upon observation and speculation.

Even the most primitive man was conscious of the regularity of time. He perceived an endless progression of daylight and darkness, the regularity of the four phases of the moon, and the appearance of the four seasons in recognizable order.

After centuries of watching the cycles of nature, man began to realize that motion and time were not as simple as he first thought them to be. (This thought, in one form or another, has hounded him to this day.) His consciousness broadened to relate and associate environmental factors with the events in his own life and lead to his dividing time into three parts: Past, present, and future. Since then, he has been concerned with breaking time into smaller and smaller parts.

In his efforts to solve the riddle of time he has developed a calendar; invented time measurement devices ranging from a crude sun-dial to the atomic clock; standardized time zones around the globe; and then had the audacity to confuse the whole issue by observing Daylight Saving Time on a complexity of dates.

I THE CALENDAR

Early peoples were migratory. They "farmed" a place for awhile, then abandoned it to go "hunting" until they found their next place to farm. Having little need for calendars of days, weeks and months, they probably reckoned time by notching sticks of wood to represent so many "suns." But as language, writing, culture and knowledge advanced in ancient civilizations, the tools were at hand to speed the process of breaking time into smaller units.

After a method of counting was devised, the early astrologers applied mathematics to their knowledge of astronomical phenomena to make the first calendar. They were plagued with the same problem modern calendar-makers face today. Weeks, months and days do not square off with astronomical cycles.

Fundamentally time is reckoned by the earth's rotation on its axis in reference to the sun, a day; by the moon's revolution around the earth, a month; and by the earth's revolution around the sun, a year.

Early calendars were based on the moon, and each month started at new moon. However, the synodical month (from new moon to new moon) is just about 29-1/2 days long. The usual custom was to make one month 29 days, the next month 30, the next 29, and so on alternately. The total length would be 354 days.

As the length of the lunar year is 11 days less than the solar year (from winter solstice to winter solstice), the discrepancy mounts up. After two years the lunar year is 22 days shorter than the solar year. After three years, it is a full month short. Because the seasons follow the solar year, calendars based on the lunar year require intercalations (adding days and/or months in between ordinary calendar days and months) to harmonize the solar and lunar reckonings.

The story of calendar-making reveals the difficult problems facing early peoples. The Babylonians, Mohammedans, Chinese, Hebrews, Egyptians and Romans had a go at it, but their calendars had to be intercalated (corrected) frequently because they were lunar based. Later, the Egyptians became the first to adopt a solar calendar. But the rest of the world resisted this change until Julius Caesar took a hand.

In ancient Rome, the calendar was changed almost every year to keep step with the seasons and with the constellations of the zodiac. By Caesar's time, the vernal equinox was falling--of all places--in December, instead of in the spring. One supreme and inflexible necessity for a workable calendar is the recurrence of the Vernal Equinox on the same day each year. This is a problem even modern man has not fully solved.

History leads us to believe that Caesar was a man who knew exactly what he wanted and how to get it regardless of whose toes he stepped on. This was demonstrated when in 46 B.C., he returned from his conquest of Egypt. He resolved to make one of the biggest time changes in history--the first great calendar reform. It had not escaped his alert eye while he was in Egypt that the solar calendar was pretty accurate as compared with the lunar calendar of his own country.

For centuries the religious machinery in all countries had resisted any calendar reform, because all of their religious festivals were timed by the lunar calendar. As dictator of the Romans, Caesar not only controlled the government, he also controlled religion. When his mind was made up he never gave a thought to consulting anyone of either the political or religious groups of his day. He came home prepared to tackle the task. He brought a Greek astronomer from Alexandria, Egypt, named Sosigenes to help him. A man who wanted everything completed by yesterday, the tyrannical Caesar announced the new calendar in just one year. Correlating the calendars of the world was no small task, and it took a driving egomaniac to push the project.

First he decreed that the year 46 B.C. was to continue for 445 days (the longest year in recorded history) to allow the calendar to catch up to the sun. At the time, the Romans were still using a lunar calendar with Hebrew intercalations. But because Roman mathematicians were not as precise as the Hebrews, their calendar had become a hopeless mess, being 80 days behind the sun.

The popular solar calendar used by the Egyptians at that time was 365 days long, even though their astronomers knew that the tropical year (from solstice to solstice, or from equinox to equinox) was closer to 365-1/4 days long. This meant that every year the calendar fell a quarter of a day, or six hours, behind the sun. In four years, it was a full day behind. In 1,460 years, it would be a full year behind.

Made aware of these factors, Caesar decided to refine the solar calendar. The length of the solar year was corrected to 365 days, 5 hours, 49 minutes and 12 seconds. He adopted the first of January as the beginning of the year in place of March 25th. And to harmonize the solar and lunar

cycles, he fixed the lengths of the months as they are today. February had 28 days in common years, 29 days every 4th year, except for the century years which were to be leap years only if divisible by 400.

After the calendars of the world were correlated, these elements were added, and the Julian Calendar, named for Caesar, became effective everywhere in the civilized world on January 1, 45 B.C. Today we call this the "Old Style" calendar. The old calendar is referred to as Julian (OS) Calendar in the TIME REFERENCE TABLES.

With this frantic work done, one would assume that at last the calendar was in good shape. With the eleven day lapse of the lunar year and the six hour lapse of the solar year corrected, surely the solar and lunar reckonings harmonized by now, did they not?

Not quite! With 365 days a year for three years out of four, and 366 days a year on the 4th year, the Julian Year averaged $365\frac{1}{4}$ days long. Modern computations give the Tropical Year, from winter solstice to winter solstice, as 365 days, 5 hours, 48 minutes, and 46.43 seconds long. It is eleven minutes shorter than the Julian average of $365\frac{1}{4}$.

What does eleven minutes amount to over the years! Well, they accumulate. In 128 years, the Julian Year gained a full day. By late medieval times the discrepancy was noted by the astronomers. It had gained ten days on the sun.

The farmers did not seem to know the difference when they planted a spring crop ten days earlier. But church dignitaries were quite concerned with this state of affairs. If the Julian Year continued on indefinitely, the seasons of the year would slowly drift through the entire year in about 46,720 years. They envisioned celebrating Christmas in the spring and Easter in summer.

This would never do! The religious leaders urged another calendar reform, and astronomers of the day advised Pope Gregory XIII to correct the calendar to harmonize with the sun.

The Pope's brother, Dr. Luigi Lilio Ghiraldi, a physician and astronomer, worked out the exact requirements for correcting the calendar, but he never lived to see them operating in the Gregorian Calendar, named after the Pope. It became effective October 15, 1582 (NS) and is termed the "New Style" calendar. The new calendar is referred to as Gregorian (NS) Calendar in the TIME REFERENCE TABLES.

To set the calendar even with the sun, Pope Gregory decreed that October 5, 1582 (OS) should be October 15, 1582 (NS), thus dropping ten days.

He also decreed a change in the leap year system to prevent the same discrepancy from happening all over again in a few centuries. He added exceptions to all fourth years being leap years. Years that ended in a double 0 were not to be leap years unless they were divisible by 400. As with the Julian Calendar, the application of this mathematical expedient provides for the dropping of three whole days which would have been gained in 400 years.

Although the Gregorian Calendar has been in operation for centuries, it is still 25 seconds longer than the Tropical Year. At this rate, it will gain a full day on the sun every 3,323 years.

Important notice should be taken of the fact that the Gregorian Calendar was not adopted by the whole civilized world as was the Julian Calendar. Some countries did not adopt it until well into the present century. The Protestant world resisted changing from the Julian Year, therefore any dates listed in Protestant countries in the past few centuries probably need to be checked for changing to the new style equivalent.

When England, a Protestant nation, adopted the Gregorian Calendar at noon on September 2, 1752, the Julian Calendar was already two centuries old. It was eleven days ahead of the sun; therefore, eleven days had to be dropped. As British laws held for the American colonies, who were not yet independent, the Gregorian Calendar was adopted in America at the same time, September 2, 1752. Even though some State areas were not settled at that time, the new style calendar date appears under each State in the TIME REFERENCE TABLES.

As the centuries passed, the Julian year gained more days on the sun. The matter of calendar switches (changing OS dates to NS dates) is of the utmost interest to anyone dealing with history--such as astrologers, astronomers, biographers, historians and researchers.

When the Julian (OS) Calendar became obsolete, ten days were dropped. Immediately following October 4, 1582 (OS) the Gregorian (NS) Calendar showed October 15, 1582.

To facilitate the changing of OS dates to NS dates through the centuries, a table of correction is presented below. The necessary correction is made by adding a certain number of days to OS dates for each century in order to obtain the equivalent NS dates.

CALENDAR CORRECTION TABLE

Century	Years	Days	Century	Years	Days	Century	Years	Days
21st	2000-99	13	14th	1300-99	8	7th	600-99	3
20th	1900-99	13	13th	1200-99	7	6th	500-99	2
19th	1800-99	12	12th	1100-99	7	5th	400-99	1
18th	1700-99	11	11th	1000-99	6	4th	300-99	1
17th	1600-99	10	10th	900-99	5	3rd	200-99	0
16th	1500-99	10	9th	800-99	4	2nd	100-99	-1
15th	1400-99	9	8th	700-99	4	1st	0-99	-2

Example: April 1, 1915 OS is the equivalent of April 14, 1915 NS.

OS	April	1,	1915	- 20th Century, add 13 days.
				+13
NS	April	14,	1915	

When George Washington was born in 1732, his birthplace, Virginia, was one of the American colonies under the dominion of the British, whose official calendar was Julian. Therefore, his "official" birth date was February 11, 1732. The Calendar Correction Table indicates that 11 days should be added for eighteenth century dates to gain the Gregorian equivalent. This explains why we celebrate Washington's birthday on February 22nd.

II STANDARD TIME

Because we live in a highly scheduled society in which a public time system is a vital necessity, we hurry to our appointments and take the matter of precise timing for granted. If our watch or clock stops, all we have to do is dial the telephone company for a recorded answer or listen to the radio for the broadcasting of time signals. This takes but a few seconds and on we go.

Think of what a frustrating experience it would be if we had to rely on the time-keeping that was used in the first part of the past century. Even today, no watch or clock, regardless of its skillful construction, is a precise timekeeper. Frequently it has to be adjusted to an accepted standard of time.

For several centuries the revolving earth has provided us with a time standard. However, this standard must be constantly corrected for two reasons. The earth itself has five or six different motions of its own, and the astronomical phenomena with which it is associated is cyclic in nature. Both of these fluctuations prevent precise timing.

As early as 1750 the British Royal Observatory established the mean solar day by astronomical and mathematical methods. The clock was corrected to the second every 24 hours to conform to the "standard day." However, as telephones, telegraph and other communication devices were not yet invented in the eighteenth century, there was no way to inform the general public of the correct time. It is said that the earliest known "time service" came into being in 1760, when a London widow would set her especially reliable watch each morning by Greenwich Observatory time and "carry" the time to her customers all over the city.

In America the United States Naval Observatory began to send out time signals by telegraph in 1865, and in 1904 they were broadcast by radio. But before these magnetic time signals were sent out, the people had to rely on various crude ways to set their clocks. Most jewelers set their watches to a nearby sundial and displayed this time in their shops. This was not very accurate because the sundials were based on solar, or sun, time which shows a constant seasonal change. The length of the day varies due to the speed of the earth in its elliptical orbit around the sun.

At that period publishers printed regional almanacs for the clock-makers listing the time of sunrise at various localities for every day of the year. Jewelers leaned heavily on this service for public time-keeping was based on the sun's passage over a local meridian. When the sun showed high noon at the court house, the town hall, or some other important place, it was noon all over town and the surrounding areas.

To people living in the early part of the nineteenth century, local time correct to a quarter of an hour satisfied their needs. Their lives were comparatively simple and unhurried, and the mode of travel was slow. There was hardly a reason for knowing what time it was in a town even 100 miles distant. Due to a difference of one minute in sun time for every 13 miles, east and west, each town, village, farm and city had its own sun time, even if they were located not too far apart.

The quickest way to travel from one place to another was by horseback or stage coach. A trip from New York to Philadelphia--a mere 90 miles--took two days to travel. But this did not hold true for the whole century for railroads were soon to follow the trails of the stage coach.

Railroads began developing rapidly just prior to and following the Civil War. Now that people could travel with more speed and ease, they began exploring this wide country of ours. But progress always presents unexpected problems. In this case the travelers were required to set their watch at every stop due to the centuries-old sun time reckoning.

The first route from Maine to California kept the passenger busy. If he was to make his connections on time, he had to set his watch back and forth some 20 times en route. If he boarded at Pittsburgh, he was faced with six clocks in the station, each one showing a different time standard governing train arrivals and departures.

We moderns feel that we have been terribly set upon trying to cope with the Daylight Saving Time issue, but obviously our ancestors had it even worse than we do. By 1880 there were 100 poorly defined time standards from coast to coast. In Michigan trains were scheduled by about 27 local times; in Wisconsin, by 38 times; in Illinois, by 27 times; and in Indiana, by 23 times.

This maddening situation spurred educators, railroad men, metrologists and engineers to try to solve the problem and establish a more uniform time pattern. Now that America was on the move, the speeded up social and economical conditions would not hold together unless more precision was brought into the time picture.

Sir Sanford Fleming, a Canadian civil engineer and scientist, had the background to help solve this problem. From 1845 into the 1870's, he had surveyed and located the first nationwide railway system in Canada. In 1878 he proposed a 24 meridian plan for the world.

Meridian concepts were not new. Maps of the known world drawn by ancient Greek thinkers were marked off by north-south lines like those drawn by the Babylonians. Thinking even then that the world was round, their talk was laced with such expressions as the "meridian of Athens" or the "meridian of Rome."

Naturally the whole globe is marked off in 360 meridians, each representing one degree (Babylonian fashion). Each degree can be divided into 60 minutes, and then each minute into 60 seconds. These meridians converge at the North Pole and the South Pole. As a rule, not every one of the 360 degree meridians is drawn. Usually they are drawn at spaced intervals, but the lines always slice up the earth like segments of an orange. The following diagram pictures this concept.

THE MERIDIANS

What Fleming suggested was 15° strips spreading across the United States and Canada, running from the Atlantic to the Pacific Ocean. Then each strip could legalize a single time of day, each differing from the preceding one by an hour, i.e., all clocks in any strip would show the same time.

Other men were working on the same problem. But it was William Frederick Allen in America who was able to assist Fleming in merging all previous plans into a practical pattern. Their time system, called standard time, was put into effect by the railroads in Canada and the United States at noon, November 13, 1883. Since fewer trains were running on that day, a Sunday was selected on which to initiate the plan.

When the railroads adopted standard time, the United States government did nothing about legalizing it across the country. Diehards, both in and out of government, resisted the change. Due to this strong opposition it was not until 1895 that most states had adopted standard time on their own, with one exception. See Minnesota in the TIME REFERENCE TABLES. Congress did not take action until March 19, 1918 when the Standard Time Act was passed. The 1918 time zone boundaries are designated by a broken line on the map of STANDARD TIME ZONES OF U.S.A.

From time to time over the years these zones have been revised. Some communities located either side of a time zone boundary found the constant changing of time presented difficulties in their mutual business transactions. Soon after the passage of the Standard Time Act they petitioned the Interstate Commerce Commission for a shift of boundaries.

In addition, the westward migration of people, the population explosion, and the development of new industrial areas brought about more time zone shifts. The dark continuous line on the map of STANDARD TIME ZONES OF U.S.A. shows this westward movement. The entire States of Michigan, Ohio and Georgia were moved from Central to Eastern Time. Although not as large, some areas were shifted in the Pacific and Mountain Time boundaries.

The United States and Canada were not the only countries concerned with time uniformity. During the nineteenth century ocean travel had also progressed rapidly, and the need for standardizing time around the world became obvious. At the Washington Meridian Conference held in 1884, the countries of the world agreed to our present standard time zone system. However, not all countries put them into effect immediately.

Because this world conference was held there, one would assume that Washington, D.C. would be selected as the first, or prime, meridian. But Great Britain was the most powerful nation in the world and had the largest navy and merchant marine. Naturally her interest for timing sea travel was of greater concern to her than to others. The conference set the Prime Meridian at Britain's Astronomical Observatory in Greenwich, an area of London. There the Prime Meridian marks 0° of longitude. England, Scotland and Wales had used this standard since 1848, and the United States had officially adopted it in 1850.

III WORLD STANDARD TIME ZONES

The world system of standard time zones in use today is based on the theoretical division of the surface of the globe into 24 zones. The standard time of each zone is the mean astronomical time of one of the 24 meridians, 15° apart, beginning at Greenwich, England, meridian, and extending east and west around the globe to the International Date Line.

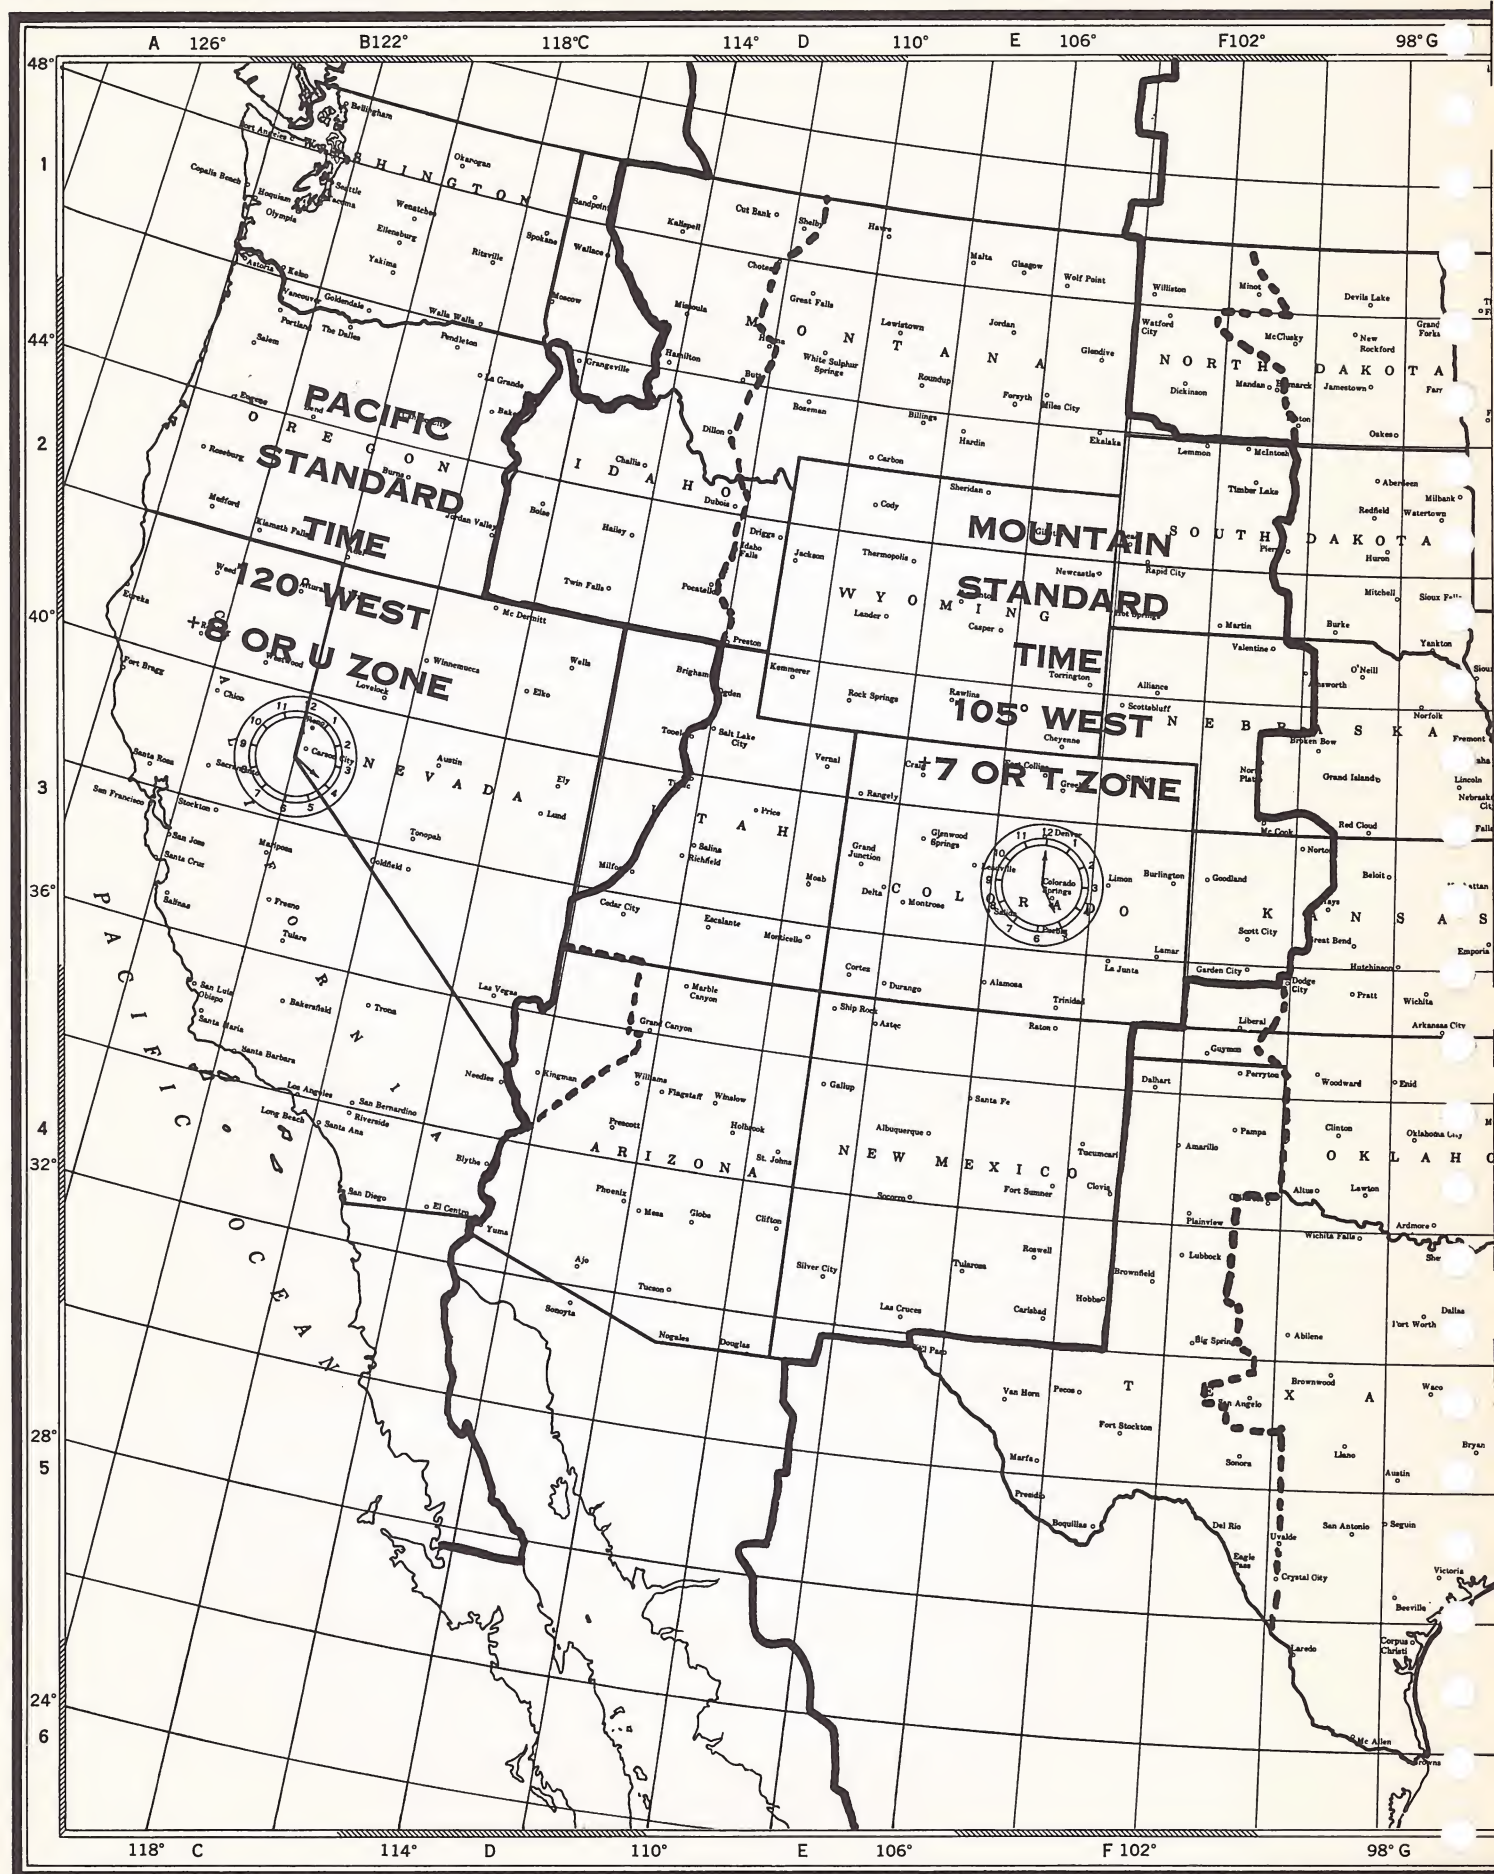

WORLD STANDARD TIME ZONES

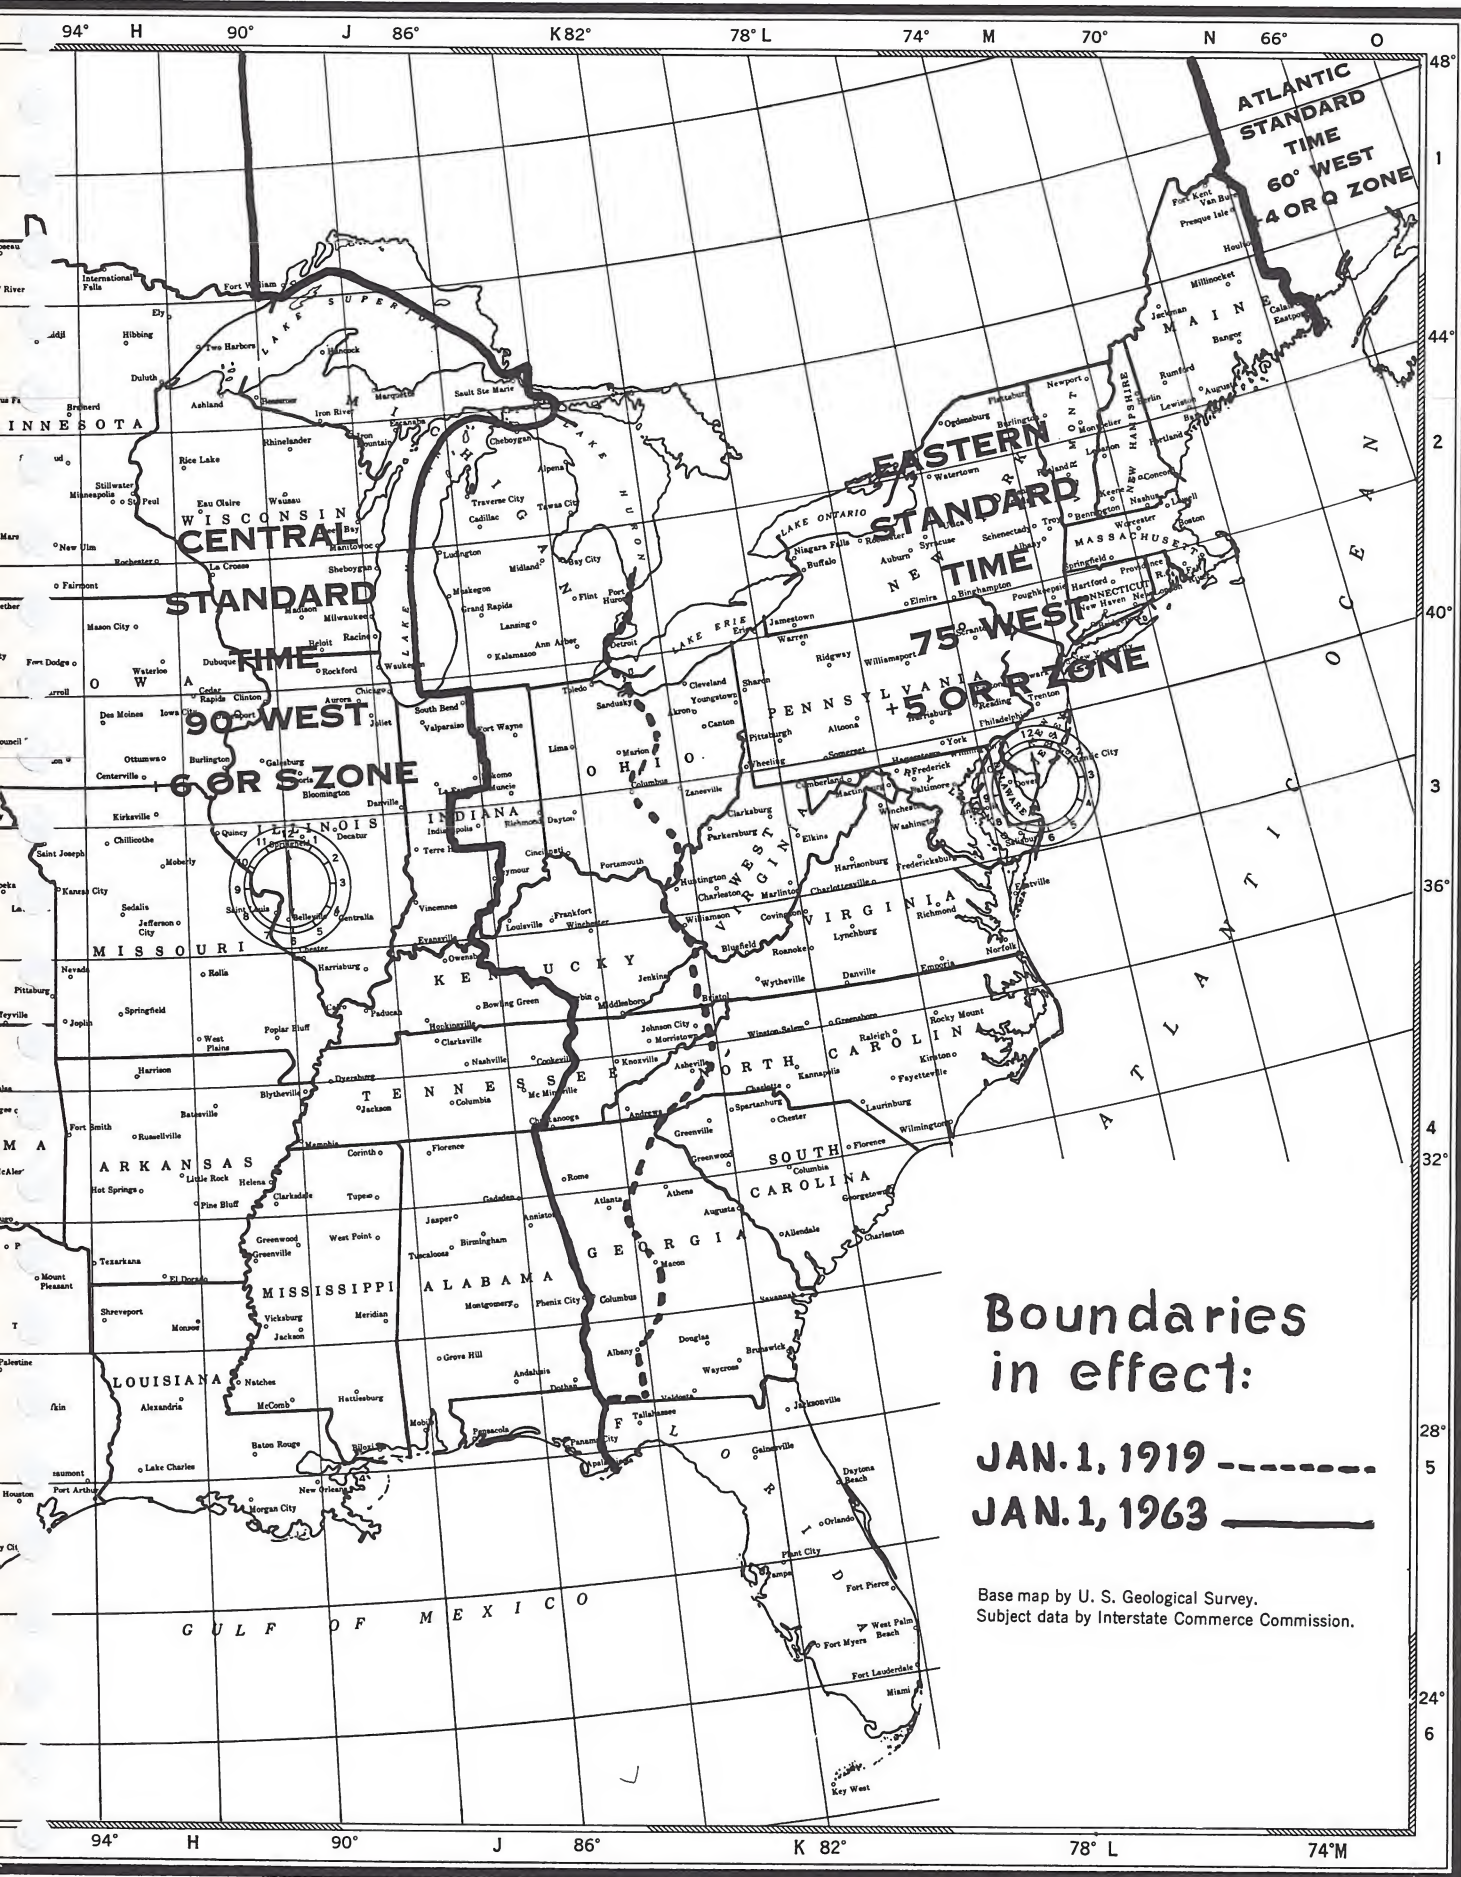

MINUS ZONES			PLUS ZONES		
Faster than Greenwich			Slower than Greenwich		
Standard Meridian <u>East Long.</u>	Zone	Zone	Standard Meridian <u>West Long.</u>	Zone	Zone
Degree	Number	Letter	Degree	Number	Letter
0	0	Z	0	0	Z
15	-1	A	15	+1	N
30	-2	B	30	+2	O
45	-3	C	45	+3	P
60	-4	D	60	+4	Q
75	-5	E	75	+5	R
90	-6	F	90	+6	S
105	-7	G	105	+7	T
120	-8	H	120	+8	U
135	-9	I	135	+9	V
150	-10	K	150	+10	W
165	-11	L	165	+11	X
180	-12	M	180	+12	Y

The corresponding 24 standards of time have been designated by numbers running east and west of Greenwich. Those east of Greenwich are referred to as Minus Zones, and their local time may be converted into Greenwich time by subtracting the zone number. For instance, Rome, Italy, is located in the 15° East Longitude zone. By consulting the table above, we note that the 15° east (1st column) indicates the necessity of subtracting one hour from the Rome clock to convert it to Greenwich time. The zones west of Greenwich are designated Plus Zones, and their local time may be converted into Greenwich Time by adding the zone number (column 2).

These 24 standards of time are also designated by letters, with Greenwich as the Z zone and running east from A to M (J is omitted) to the International Date Line, and west of Greenwich from N to Y. The system of numbers and letters is shown in the Table above, and the U.S.A. letters and numbers may be seen on the map of STANDARD TIME ZONES OF THE U.S.

STANDARD TIME ZONES OF THE UNITED STATES

Boundaries
in effect:

JAN. 1, 1919 -----

JAN. 1, 1963 —————

Base map by U. S. Geological Survey.
Subject data by Interstate Commerce Commission.

In addition to the regular 24 standards of time based on hourly differences, some countries or sections have adopted standard time based on half-hour differences. For example, Newfoundland has a time midway between plus zones 3 and 4 (3-1/2 hours slower than Greenwich); Venezuela, midway between zones plus 4 and 5 (4-1/2 hours slower than Greenwich); India, midway between minus zones 5 and 6 (5-1/2 hours faster than Greenwich); and Iran, between minus zones 3 and 4 (3-1/2 hours faster than Greenwich).

Furthermore, not all countries base their standard time on an even hour or a half-hour of longitude. Among these are Afghanistan (4 hours and 26 minutes east of Greenwich), and British Guiana (3 hours and 45 minutes west of Greenwich). A few countries still ignore the World Time Zones. One of these is Saudi Arabia, where "Arabic Time" is observed. Every day all watches and clocks are set to midnight at sundown.

U. S. A. STANDARD TIME ZONES

West Long. Degree	Zone Number	Zone Letter	Designation of Time
75	+5	R	U.S. Standard Eastern Time
90	+6	S	U.S. Standard Central Time
105	+7	T	U.S. Standard Mountain Time
120	+8	U	U.S. Standard Pacific Time
150	+10	W	U.S. Standard Alaska Time

Formerly the Hawaiian Standard Meridian was 157°W30'. In 1947 Hawaiian Standard Time was discontinued and Central Alaska Standard Time (150°W) was adopted. Since then, Hawaiian Standard Time has been considered the same as Alaska Time (10 hours west of Greenwich). The zone west of the Pacific Zone, including a small portion of Southeastern Alaska and the Canadian Province of Yukon, observes Yukon Time (9 hours west of Greenwich). Along the west coast of Alaska and in the Aleutian Islands, Bering Time (11 hours west) is used. See maps of Alaska and Hawaii in the TIME REFERENCE TABLES. The time of the zone immediately to the east of the United States (4 hours west) is commonly referred to as Atlantic Time (formerly called Inter-Colonial Time).

On April 13, 1966, President Lyndon B. Johnson signed a new time bill which provided for three new time zones to be added to the five existing zones, primarily to provide a standard for Puerto Rico, Hawaii and certain U.S. Possessions. See U.S. POSSESSIONS, TERRITORIES AND TRUSTEESHIPS and UNIFORM TIME ACT OF 1966.

Before leaving the subject of World Standard Time Zones, let's look at the International Date Line, a hypothetical line following the meridian of 180° from the North Pole to the South Pole.

As there are 12 zones west and 12 zones east of the Prime Meridian, if two men left Greenwich at noon--one traveling east and one traveling west at the same rate of speed--they would both arrive at the International Date Line at midnight, but on different dates. The one traveling east would pass over areas where it is later and later in the day; the other traveling west would pass over areas where it is earlier and earlier in the day. The man going east would arrive at the Date Line a day later than Greenwich, and the man going west would arrive a day earlier. To solve this problem, a 24-hour correction must be made at the Date Line. But instead of adjusting the clock, as when crossing time zone boundaries, the calendar is adjusted. The adjustment is one day backward if the traveler is going from Asia to America (east) and one day forward if he is going from America to Asia (west). A day is not really lost. For by the time the travelers meet again at Greenwich they will not have lost a single second.

This date changeover line does not follow exactly the 180th meridian. Russia prefers to keep all of Siberia on the western side of the line; the United States prefers to keep the Aleutian Islands on the eastern side of the line; and some of the South Sea Islands are kept with Australia. All of the mentioned areas lie across the 180th meridian.

As a result, the International Date Line is not a straight line. It zigzags about one-half of its length so that it will not cross any land area. After all, a single nation would dislike the idea of observing two calendar dates at the same time within its own boundaries.

INTERNATIONAL DATE LINE

A study of the illustration of the International Date Line will show why it was wise to choose Greenwich, England, for the location of the Prime Meridian. Because the 180th meridian must fall half-way around the globe from the Prime Meridian, if it had been placed at another starting point, the International Date Line would have run through several countries.

IV DAYLIGHT AND WAR TIME

When Benjamin Franklin was ambassador to France in 1784, he suggested that people set their clocks ahead in the summer to make good use of the extra hours of daylight, because the sun "gives light as soon as he rises." His selling point was that by retiring early, they would have to buy less candles. Further they could enjoy the summer weather longer and avoid the unhealthy candle smoke. Franklin's idea was ignored. Living up to their reputation, Frenchmen continued burn the candle at both ends.

Daylight Saving Time was first proposed in modern times by William Willet, an Englishman, in a pamphlet entitled "Waste of Daylight," published in 1907. But the first systematic use of Daylight Saving Time came about during World War I. In 1916, Germany observed it to conserve fuel used to produce electricity. Not long after this, Britain and most of the Western European countries adopted "Summer Time," a term synonymous with Daylight Saving Time.

The United States and Canada observed Daylight Saving Time in 1918 and 1919, as a wartime measure. Then from February 9, 1942 until September 30, 1945, Daylight Saving Time was again observed nationwide. It was called War Time by President Franklin D. Roosevelt. These war periods have been the only times when Daylight Saving Time was observed uniformly across the nation. In 1920, a congressional act discontinued Daylight Saving Time; however, local communities began to pass ordinances to observe it anyway. That is where the confusion began.

The Local Ordinance Listing in the TIME REFERENCE TABLES under the States shows, in a graphic manner, the multiple variances which occurred. In some instances these listings are incomplete. As some cities and towns failed to keep records of these changes, or records were lost or destroyed, it would be difficult indeed to complete a work of this scope.

In spring and summer the sun rises earlier and sets later, thus making daylight hours longer. Therefore, the six months covered by Daylight Time have usually started in April and ended in September or October. But don't let that fact stick in your mind, for many communities did not conform to these dates. Starting dates vary anywhere from the middle of March to the middle of June. Ending dates occurred anywhere from late August to the first of November. In certain areas when there was a power shortage, Daylight Time was observed all year. So each and every community and date needs to be checked thoroughly.

When Daylight Saving is in effect, the clock is set one hour ahead. Then when standard time comes in again, the clock is set back the hour. A good way to remember what to do is to recall the old saying: "Spring ahead, fall back."

Daylight Saving Time is the use of the time used as standard time in the next time zone to the east. Thus, D.S.T. is really one result of an international time standard. Even though these observance DST dates are confusing nationwide, and some railroads still run on standard time during the months that daylight time is observed, we still have it better than our ancestors. Instead of clocks displaying five or six times at the railway station, at the most there are only two; one for standard, and one for daylight.

V TIME REFERENCE TABLES

Understanding the following points will allow you to use the tables with more speed and accuracy.

(1) REVIEW

A review of the other sections in this book, especially abbreviations, the calendar and world standard time zones, will facilitate the use of the Time Tables.

(2) LONGITUDE

The longitude of a specific standard meridian is indicated in parenthesis, i.e., EST (75°W).

(3) HOURS

When an hour for the time switchover is given, it always indicates the kind of time which has been in effect.

- (a) 2:00 A.M. is the usual hour
- (b) 0:01 A.M. is indicated by an *
- (c) 1:00 A.M. is written out
- (d) Noon is designated as such

(4) YEARS, MONTHS AND DAYS

Years given are always inclusive. 1920-30 indicates 1920 through 1930. When months and days are given numerically, the first figure represents months, i.e., May 27 is written 5/27.

(5) WAR TIME

Note carefully that War Time dates are not given in the Local Ordinance Listings, and the beginning and ending dates are not given in the Table. Always check the references under DAYLIGHT (OR WAR) TIME OBSERVED.

(6) COMMUNITIES

A community is defined as a village, town or city.

(7) COUNTIES

Note that Counties usually appear before communities in the Local Ordinance Listings. In cases where a county observes DST, all of its communities are not listed. Consult an atlas or a postal book to learn in which county the city you are looking for is located.

(8) ARMY INSTALLATIONS

U.S. Army Installations usually observe DST of their specific local standard time zones, even though the surrounding area may not.

(9) PRACTICALLY STATE-WIDE

This reference means that rural communities may not observe DST even though most of the State does. In these cases, local authorities of specific locations in the mentioned State should be queried.

(10) GENERAL INFORMATION

The variance of an Interstate Commerce Commission regulation and the actual observance of a Standard Time Zone boundary is often wide. And the date of legislative action in the observance of DST is not always the date when the law becomes effective. This is often seen in dates given for the States of Michigan and Ohio. Road maps give a mixture of I.C.C. and informal standard zone boundaries and cannot be relied upon.

ALASKA

1799		Russian territory operated under Julian (OS) Calendar
1856		Russia first offered to sell it to the U.S.
1857	3/30	Treaty signed for its purchase
	4/9	Treaty ratified by the Senate
	10/16	Transferred to U.S. before payment. Calendar converted to Gregorian (NS). Instead of the usual 12 days (for 19th century), 11 days were dropped from the calendar as the extra day was supplied by the International Dateline.
1868	7/14	The House appropriated the money for its purchase.
1883	11/18	Noon. Theoretical adoption of Central Alaska Standard Time (CAT, 150 ^{OW}). However, it was not observed until 1900.
1900	8/20	Four Alaska Time Zones established: (1) PST (Pacific Standard Time) 120 ^{OW} (2) YST (Yukon Standard Time) 135 ^{OW} (3) CAT (Central Alaska Standard Time) 150 ^{OW} (4) NT (Nome Standard Time) 165 ^{OW}
1912	8/24	Area organized as a territory
1959	1/3	State entered the Union

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

1942 2/9 - 9/30/45 World War II

No Daylight Time observed. This was due in part to the widely spread and sparsely populated communities, and to the fact that its location is so far north.

NOTE: When the North Pole is tilted away from the sun as much as possible, the farthest points in the North which can still be reached by the sun's rays are 23° and 17' from the pole. This is the Arctic Circle. The midnight sun is a phenomena of the Northern part of the State. The sun does not set from the middle of May until the end of July, nor does it rise above the horizon from approximately November 20 to January 24.

authorities

HAWAII

- 1778 Discovered by Capt. James Cook, who named it the Sandwich Islands. Ruled by native monarchs until 1893.
- 1843 Seized by a British naval officer, but was disavowed. Britain and France recognized the independent status of the Kingdom of Hawaii.
- 1849 France seized it but restored it at once.
- 1851 The King offered it to the U.S. who refused it.
- 1875 Reciprocity treaty with U.S. increased trade.
- 1884 Treaty renewed to include lease of Pearl Harbor for a U.S. Naval Base.
- 1893 Revolution; became a Republic, operating under the Gregorian (NS) Calendar.
- 1894 Asked U.S. for annexation.
- 1898 7/7 U.S. voted on its annexation.
8/12 Annexation effective.
- 1900 ** Organized as a territory. Hawaiian Standard Time (HST, 157°W30') observed in various parts.
- 1947 6/8 Central Alaska Standard Time (CAT, 150°W) adopted at 2 A.M. (This, in effect, added 30 minutes.) Hawaiian Standard Time was discontinued.
- 1959 8/21 State entered the Union.

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

- 1918 3/31-10/27 World War I, U.S. officials only

TABLE

1946	To 1965	Not observed

IDAHO

34

1752 9/14 Gregorian (NS) Calendar adopted in U.S.A.

1824 Area settled

1883 11/18 Noon, Pacific Standard Time (120°W) adopted by the railroads. However, local time was used in most communities.**

1890 7/3 State entered the Union

1919 6/1 Mountain Standard Time boundary extended west to include a small portion of Idaho. (See map on page 14.)

1923 5/13 Southern portion of State adopted MST (105°W), except places north of Lewiston (46N24, 117W01) and Grangeville (45N56, 116W07). Line drawn at Avery (47N15, 115W48); however, Saint Maries (47N18, 116W35) remained on PST.

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

1918 3/31 - 10/27 World War I

1919 3/30 - 10/26 World War I

1920 To 1941 Not observed state-wide. See Local Ordinance Listing.

1942 2/9 - 9/30/45 World War II

1943 To 1965 Not observed state-wide. See Local Ordinance Listing.

1964: Communities north of Salmon River observed varying beginning and termination dates, and are not listed under Local Ordinance Listing. **

OBSERVATION BY LOCAL ORDINANCE:
(Refer to Table for month & day)

ILLINOIS

1720		Area settled
1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1818	12/3	State entered the Union
1883	11/18	Noon, Central Standard Time (90°W) adopted
1936		See this year under daylight time listing.
<u>DAYLIGHT (OR WAR) TIME OBSERVED:</u> (Changes at 2 A.M.)		
1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I
1920	To 1936	Not observed state-wide. See Local Ordinance Listing.
1936	3/1 - 11/1	Some communities (as in Local Ordinance Listing) switched to Eastern Standard Time (75°W), then returned to CST. For convenience and because CDST coincides with EST, this information appears in Table I, even though it is a standard time reference.
1937	To 1941	Not observed state-wide. See Local Ordinance Listing
1942	2/9 - 9/30/45	World War II
1946	To 1958	Not observed state-wide. See Local Ordinance Listing.
1955: By this time 628 communities were observing CST		
1957: 385 communities ended DST on 9/29; and 365 on 10/27		
1958: By now DST generally observed from April to October by Chicago, Peoria and 500 communities. In a number of other places, DST observed until 9/28.		
1959	7/1	Entire State adopted DST, which terminated 10/25. However, the places which had been observing DST in previous years turned the clocks ahead one hour on 4/26

TABLE I

INDIANA

1733		Area settled
1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1816	12/11	State entered the Union
1883	11/18	Noon, Central Standard Time (90°W) adopted
1955		From this year until 1965, more and more communities began observing EST year round. The Map Section for these years will show the increasing areas observing EST.
1958	11/2	Franklin adopted EST (75°W)
1961	7/23	Official Eastern Standard Time Zone Line was moved westward into Indiana for the first time. This Interstate Commerce Commission order encompassed 43 counties, but all or parts of 20 counties which had been observing informal EST (75°W) were omitted. See Map Section.

NOTE: INDIANA, without doubt, presents the most confused time picture in all of the 50 states. Some eastern borderline communities observed informal EST before 1955, and local authorities should be checked for specific information.

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I
1920	To 1941	Not observed state-wide. See Local Ordinance Listing.
1942	2/9 - 9/30/45	World War II
1946	To 1948	Not observed state-wide. See Local Ordinance Listing.

TABLE

1918	War Time	1940	4/28-9/29
1919	War Time	1941	4/27-9/28
1920	6/13-10/31	1942-45	War Time
1921	3/27-10/30	1946	4/28-9/29
1922	4/30-9/24	1947	4/27-9/28
1923	4/29-9/30	1948	4/25-9/26
1924	4/27-9/28	1949	4/24-9/25
1925	4/26-9/27	1950	4/30-9/24
1926	4/25-9/26	1951	4/29-9/30
1927	4/24-9/25	1952	4/27-9/28
1928	4/29-9/30	1953	4/26-9/27
1929	4/28-9/29	1954	4/25-9/26
1930	4/27-9/28	1955	4/24-9/25
1931	4/26-9/27	1956	4/29-9/30
1932	4/24-9/25	1957	4/28-9/29
1933	4/30-9/24	1958	4/27-9/28
1934	4/29-9/30	1959	4/26-9/27
1935	4/28-9/29	1960	4/24-9/25
1936	4/26-9/27	1961	4/30-10/29
1937	4/25-9/26	1962	4/29-10/28
1938	4/24-9/25	1963	4/28-10/27
1939	4/30-9/24	1964	4/26-10/25
		1965	4/25-10/31

1949 To 1955	State law called for CST all year, but business establishments (in towns listed in Local Ordinance Listing for these years) opened and closed one hour earlier. However, most of the clocks remained on CST. For communities observing EST all year, see Map Section.
1956	Not observed state-wide. See Local Ordinance Listing and Map Section.
1957 To 1965	DST obligatory by state law. Refer to Table for dates. Local communities continued to observe their own desired DST times, with some communities observing fast time (EST) all year. See Local Ordinance Listing and Map Section issued by the Indiana State Chamber of Commerce.

OBSERVATION BY LOCAL ORDINANCE:

(Refer to Table for Month and Day if not shown)

NOTE: In 1920, DST was discontinued as a state ordinance but continued by local ordinances as noted below. This information is incomplete; however, it may be used as a key to DST observance. Information on all communities is not known, and therefore not all years are included.

INDIANA MAP SECTION

Presented on the following pages are Indiana Time Maps for the Fall and Winter months between Daylight Saving Time Dates from 1955 through 1965.

LEGEND

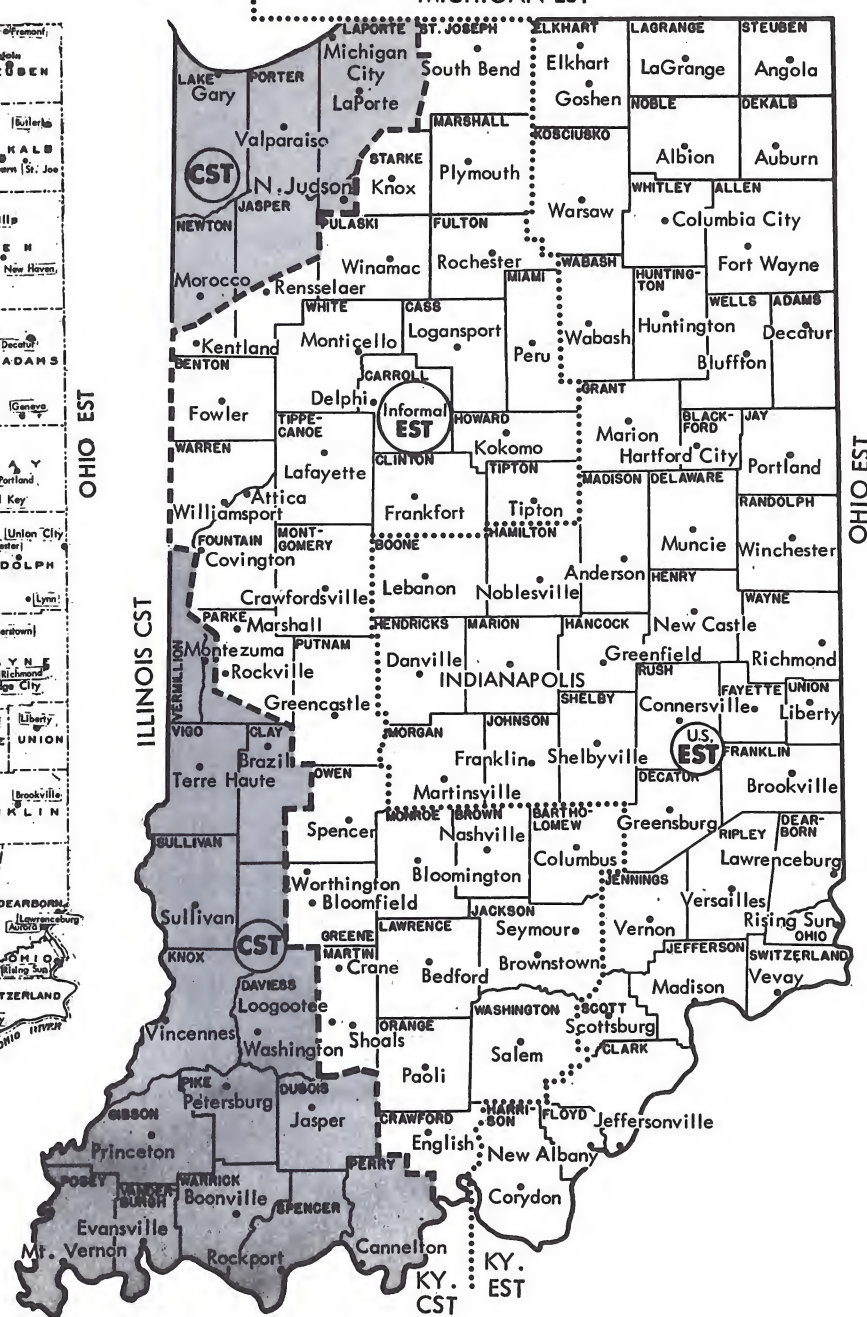

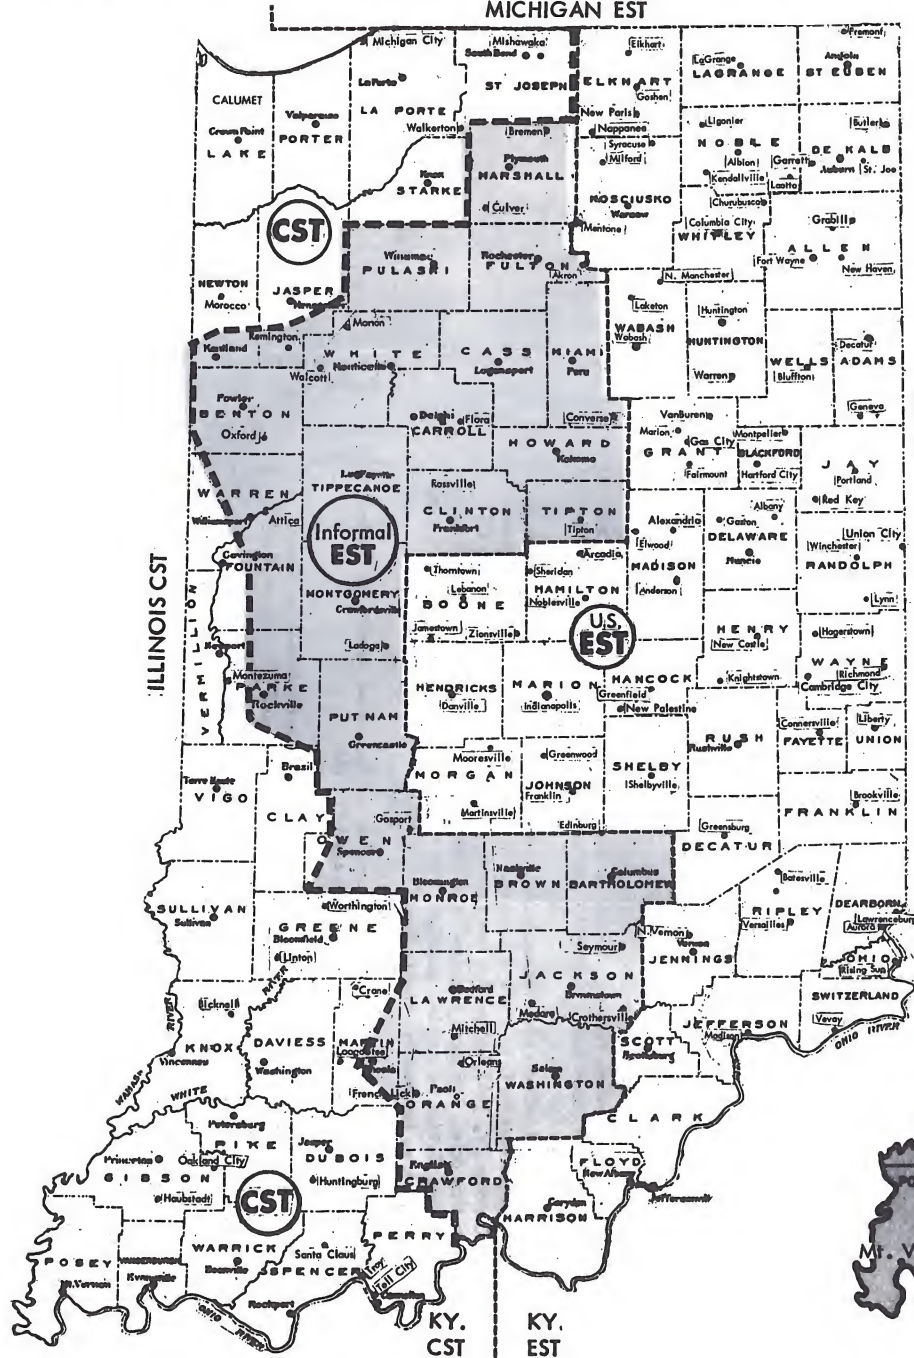

Maps 1955 through 1961: Communities indicated by a full dot observed Eastern Standard Time all year. Those represented by an open dot observed Central Standard Time in the Fall and Winter months, then switched to Central Daylight Saving Time in the Spring and Summer.

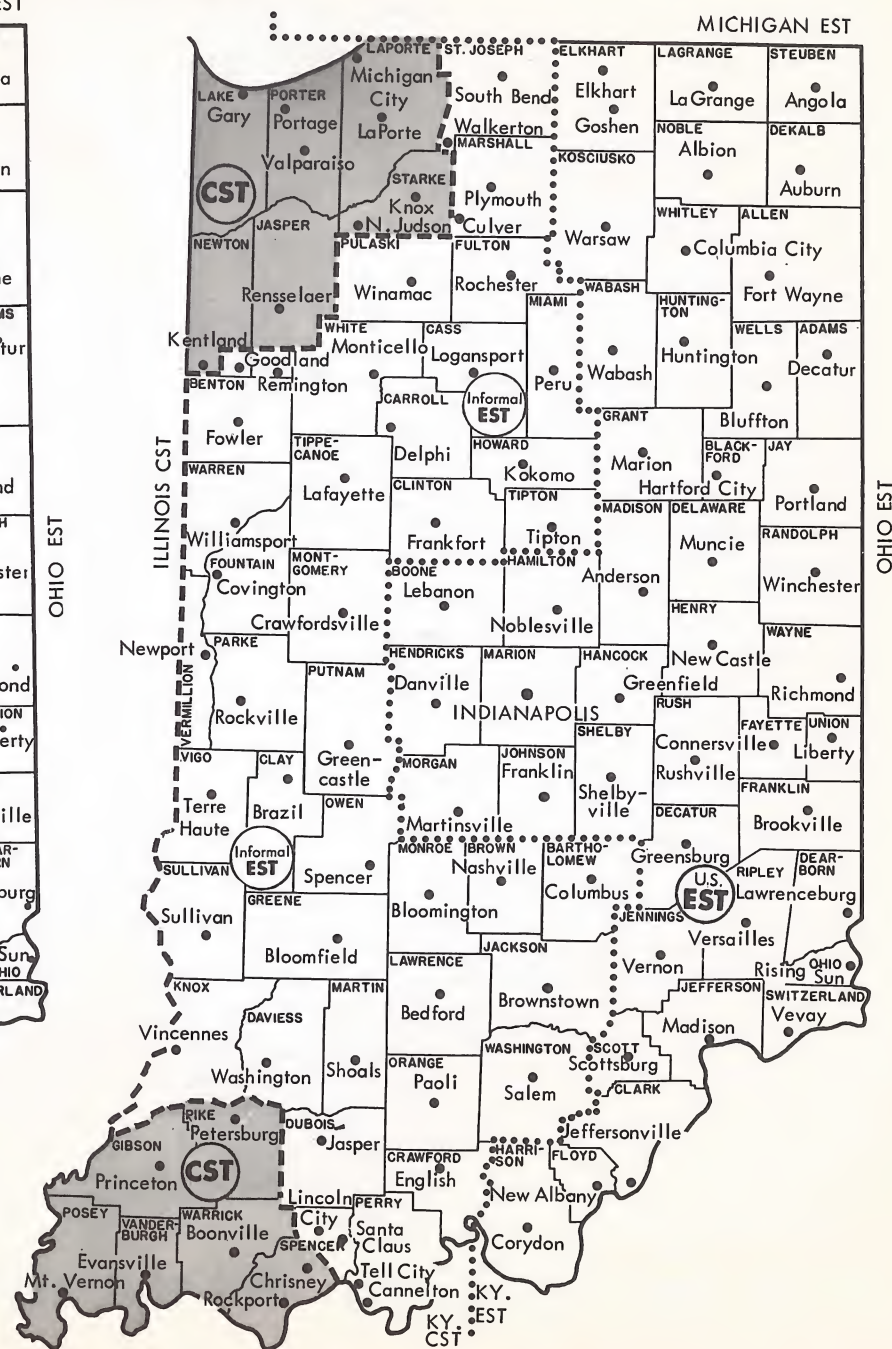

Maps 1961 through 1965: Dots same as in above paragraph. Further, the light broken line in the 1961 map running from Michigan to Kentucky designates the Interstate Commerce Commission official Eastern Standard Time Zone Boundary adopted July 23, 1961.

INDIANA TIME MAP

FALL-WINTER 1965-66

IOWA

1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1788		Area settled
1846	12/28	State entered the Union
1883	11/18	Noon, Central Standard Time (90°W) adopted

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I
1920	To 1941	Not observed except in Davenport. See Local Ordinance Listing.
1942	2/9 - 9/30/45	World War II
1946	To 1963	Local option by communities and varying dates of observance presents a picture of utter confusion. Dates and places not listed below should be checked with local agencies. Local Ordinance Listing is incomplete. **
1964		DST generally observed in Eastern Iowa from 4/26 to various termination dates in August, September and October; some localities started DST in May, some in June. Some cities and towns in Central and Western Iowa also on DST. Local Ordinance Listing is incomplete. **
1965	5/30 - 9/6	Observed state-wide. Refer to Table for dates.

OBSERVED BY LOCAL ORDINANCE:
(Refer to Table for Month & Day if not shown)

KENTUCKY

1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1765		Area settled
1792	6/1	State entered the Union
1883	11/18	Noon, Central Standard Time (90°W) adopted
1920	**	Covington adopted EST (75°W)
1927	4/3	Newport adopted EST (75°W)
1947	9/28	The Interstate Commerce Commission moved the EST boundary line to include additional portions of Kentucky.
1960	4/3	Eastern Standard Time (75°W) effective in most of the eastern half of the State. New line started at the southwest corner of Ohio, and follows the Ohio River along the Indiana border to the mouth of the Kentucky River. Following the Kentucky River, the line passes through Carroll County and then follows a generally southward direction along the westward borders of Owen, Franklin, Anderson, Mercer, Boyle, Lincoln, Pulaski and McCreary Counties. This line puts all of the Blue Grass section on Eastern Time as well as Gallatin County and half of Carroll County, including the City of Carrollton.
1961	7/23	Louisville area adopted EST (75°W)
<u>DAYLIGHT (OR WAR) TIME OBSERVED:</u> (Changes at 2 A.M.)		
1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I

NORTH DAKOTA

1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1780		Area settled
1883	11/18	Noon, Mountain Standard Time (105 ⁰ W) adopted in southwestern portion. Rest of State adopted Central Standard Time (90 ⁰ W) except Flaxton, Minot and Portal (located in Northwestern portion) which adopted MST (105 ⁰ W).
1889	11/2	State entered the Union.
1929	12/8	1:00 A.M., CST adopted state-wide; however, southwestern tip of State continued on MST.
1931	1/31	The 1929 Act was repealed and the 1883 picture returned to the State.
1945	9/30	At termination of War Time southwestern tip of State continued on MST, and the remainder of the State observed CST. (1)
1960	5/15	Mandan adopted CST (90 ⁰ W) permanently.

DAYLIGHT (OR WAR TIME) OBSERVED
(Changes at 2 A.M.)

1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I
1920	To 1941	Not observed
1942	2/9 - 9/30/45	World War II
1946	To 1960	Not observed state-wide. See Local Ordinance Listing.
1961	To 1965	Not observed. Daylight Savings Time prohibited by State legislative action.

OHIO

1752 9/14 Gregorian (NS) Calendar adopted in U.S.A.
 1788 Area settled
 1803 3/1 State entered the Union

STANDARD TIME ZONE SHIFTS

1883 11/18 Noon, Standard Time was adopted by railroads and government offices. However, part of the general public continued the use of Local Mean Time until 1893. **

1890 1/1 Central Standard Time (90°W) adopted in Springfield

1890 6/15 Central Standard Time (90°W) adopted in Cleveland

1893 4/1 Noon, Central Standard Time (90°W) adopted state-wide

1914 5/1 Cleveland adopted Eastern Standard Time (75°W) *

1919 1/1 (1) Western boundary of Eastern Standard Time Zone was drawn through Fremont, Clyde, Bellevue, Monroeville, Willard, Shelby, Shelby Junction, Galion, Lancaster, Dundas and Gallipolis, Ohio.

1919 5/11 Sandusky adopted EST at 2 A.M.

1919 6/1 (1) The EST Zone line was redrawn farther to the east, thus excluding the points mentioned in 1919, 1/1 above, from the eastern zone.

1920 6/6 Mount Vernon was included in the eastern zone.

1922 4/1 (1) The EST boundary line was again changed to include Toledo and other portions of northern Ohio in the eastern zone. **

1924 3/30 (1) The eastern zone was extended to include Columbus, Fostoria and Gallipolis and other points. **
 NOTE: Columbus did not comply, see 1926.

See Ohio Map under
1966 TIME PICTURE

* Change at 0:01 A.M.

** Check with local
 authorities

- 1924 8/31 (1) There was a further extension of the eastern zone to include Findley, Kenton and Marysville, and a portion of the State north of Columbus.* & **
- 1925 Fremont adopted EST
- 1926 9/26 EST adopted in:
- | | | |
|----------|--------|------------|
| Akron | Dayton | Newark |
| Canton | Elyria | Portsmouth |
| Columbus | Lima | |
- 1927 4/4 (1) The eastern zone was extended to include all Ohio points on and east of the main line of the Baltimore and Ohio Railroad from Toledo to Cincinnati.** This put most of the major cities, including Cincinnati, Springfield and Steubenville, on EST.
- 1936 9/27 (1) 2 A.M. By order of the Interstate Commerce Commission, the entire State of Ohio was put on EST, including several small borderline towns which had clung to their former Central Time despite the 1927 order.**

- (1) However, in many instances the changes in local statutes or ordinances did not coincide with the change made by the Interstate Commerce Commission in the official Federal boundaries. The dates given above are those on which the change was effective for the purposes covered by the Standard Time Act.

OREGON

1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1838		Area settled
1859	2/14	State entered the Union
1883	11/18	Noon, Pacific Standard Time (120°W) adopted, except Ontario (MST 105°W)

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I
1920	To 1941	Not observed
1942	2/9 - 9/30/45	World War II
1946	To 1950	Not observed state-wide. See Local Ordinance Listing.
1951		Observed state-wide, except Malheur County, which observed MST (105°W) year round.
1952	To 1962	Not observed state-wide. See Local Ordinance Listing.
1963	To 1965	Observed state-wide. Refer to Table for dates.

NOTE: Much of Southeast Oregon observes Mountain Standard Time (105°W) year round due to its economic tie to Idaho. Time for communities on that state border should be investigated thoroughly.

OBSERVATION BY LOCAL ORDINANCE:
(Refer to Table for Month & Day)

PENNSYLVANIA

1682		Area settled
1752	9/14	Gregorian (NS) Calendar adopted in U.S.A.
1787	12/12	State entered the Union
1887	1/1	Pittsburgh and suburbs adopted Eastern Standard Time (75°W)
1887	4/13	Eastern Standard Time (75°W) adopted state-wide except Erie
1887	7/1	Erie adopted EST (75°W)
<u>DAYLIGHT (OR WAR) TIME OBSERVED:</u> (Changes at 2 A.M.)		
1918	3/31 - 10/27	World War I
1919	3/30 - 10/26	World War I
1920	To 1941	Observed in parts of State. See Local Ordinance Listing.
1942	2/9 - 9/30/45	World War II
1946	To 1964	More and more communities began to observe DST until in 1964 only one small village (Yatesville) remained on Standard Time. By 1964 all communities save Yatesville began DST on the last Sunday in April and with one exception ended DST on the last Sunday in October. LaJose ended DST on the last Sunday in September.
1965	4/25 - 10/31	Observed state-wide.
<u>OBSERVATION BY LOCAL ORDINANCE:</u> (Refer to Table for Month and Day if not shown)		

NOTE: In 1920, DST was discontinued as a State ordinance, but continued by local ordinances as noted below. This information is incomplete; however, it may be used as a key to DST observance. Information on all communities is not known, and therefore not all years are included.

TENNESSEE

- 1752 9/14 Gregorian (NS) Calendar adopted in the U.S.A.
- 1757 Area settled
- 1796 6/1 State entered the Union
- 1883 11/18 Noon, Central Standard Time (90°W) adopted, except
borderline communities of Bristol, Elizabethton,
Erwin and Johnson City, on EST (75°W)
- 1941 7/21 All State offices on CST (90°W); compliance voluntary
for citizenship.
- 1946 EST adopted year round for 1946 only in:

Alcoa	Jefferson City	Morristown
Bristol	Johnson City	Newport
Chattanooga	Jonesboro	Norris
Clinton	Knoxville	Oak Ridge
Dandridge	Lenoir City	Rogersville
Gatlinburg	Loudon	Sevierville
Greeneville	Maryville	Sweetwater

- 1947 9/28 Official EST boundary moved west to include additional
portions of Eastern Tennessee**
- 1949 EST adopted in the Chattanooga area, embracing Hamilton
County on 8/14, and extended to include Rhea County on 8/28
- 1960 4/3 EST (75°W) effective in a portion of Northern Tennessee,
including Scott, Morgan and Roane Counties.**

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

- 1918 3/31 - 10/27 World War I
- 1919 3/30 - 10/26 World War I

TEXAS

- 1686 Area settled
- 1752 9/14 Gregorian (NS) Calendar adopted in U.S.A.
- 1845 9/29 State entered the Union
- 1883 11/18 Noon, Central Standard Time (90°W) adopted except in El Paso, Pecos and the Westernmost part of the State, which through the years has observed Mountain Standard Time (105°W).
- 1921 Official U.S. boundary of the CST Zone was moved westward to include all of Texas; however, El Paso, Pecos and the surrounding area continued to observe MST all through the years.

DAYLIGHT (OR WAR) TIME OBSERVED:
(Changes at 2 A.M.)

- 1918 3/31 - 10/27 World War I
- 1919 3/30 - 10/26 World War I
- 1920 To 1941 Not observed
- 1942 2/9 - 9/30/45 World War II. War Time observed except in El Paso and Pecos where MST was observed. (MST is, in effect, the same as Central War Time.)
- 1946 To 1965 Not observed

UNITED STATES POSSESSIONS, TERRITORIES AND TRUSTESHIPSAMERICAN SAMOA

Non-Self-Governing U.S. Territory

The seven eastern islands of the Samoan Group, located along the 14 degree S. Lat., and near 170°W Long., 2,300 miles S.W. of Hawaii in the South Pacific Ocean.

- 1872 Port Pago Pago, former U.S. Navy coaling station, was acquired by commercial treaty with the native king.
- 1899, 12/2 Under the Berlin convention, became a possession of the U.S.
- 1900, 2/16 Treaty ratified in which the U.S. was internationally recognized to have rights extending over the seven eastern islands of the Samoan group.
- 1900, 4/17 The chiefs of Tutuila and Annuu ceded these two islands to the U.S.
- 1904 The king and chiefs of the Manua Islands ceded Tau, Olosega and Ofu to the U.S.
- 1925, 3/4 Swain's Island annexed by the U.S.
- 1911 Standard Time Meridian of 172°W30' adopted
- In recent years the Standard Time Meridian was changed to 165°W00'
- No Daylight Savings Time observed

BAKER, HOWLAND and JARVIS ISLANDS

Non-Self-Governing U.S. Territory

Located in the South Pacific in a widely spread area, they are approximately 1,600 miles S. of Hawaii.

- 1832 Baker Island discovered
- 1857, 9/30 U.S. occupation
- 1936, 5/13 Extraterritorial plans of the U.S. allowed the perfection of its claim on these three islands.
- 1942 Although they have been uninhabited since 1942, Jarvis (a British possession) was used for the construction of radio towers.
- Standard Time Meridian: 165°W00'

CANAL ZONE

Non-Self-Governing U.S. Territory

A 50-mile strip bounded by the Atlantic and Pacific Oceans between North and South America

1899 A second French company failed to build a canal. The U.S. bought their rights and offered Columbia compensation for a canal zone, but Columbia failed to ratify the treaty.

1903, 11/3 Panama declared itself independent of Columbia

1903, 11/18 Canal strip granted to the U.S. by treaty

1904, 2/26 Treaty was ratified

LMT of Colon (79°W54') to 1918

* 1918, 4/22 Standard Time Meridian of 75°W00' adopted

No Daylight Savings Time observed

CANTON AND ENDERBURY ISLANDS

Non-Self-Governing U.S. Territory

Canton is the largest of the Phoenix Group in the Central Pacific, about half-way between Hawaii and Australia. One of the U.S. manned Space Flight Tracking Stations is there.

Enderbury, which is about 32 miles S.E. of Canton, is uninhabited.

1939, 4/6 U.S. and Great Britain agreed on a system of joint control and administration to keep the islands available for communications and for use as airports for international aviation of both governments.

Standard Time Meridians: 165°W00' and 180°E00'

CAROLINE ISLANDS. See Trust Territories.

CORN ISLANDS

Non-Self-Governing U.S. Territory

Great Corn and Little Corn are located in the Caribbean East of Nicaragua.

1914 Leased for 99 years from Nicaragua by the U.S.

Standard Time Meridian: 90°W00'

ENDERBURY ISLAND. See Canton.

* Change at 0:01 A.M.

GUAM

Non-Self-Governing U.S. Territory

The largest of the Mariana Islands situated in the North Pacific.

- 1521, 3/6 Discovered by Magellan
- 1668 Colonized by Spanish Missionaries
- 1898, 12/10 Ceded to the U.S. by Spain
- 1941, 12/11 Seized by Japan
- 1944, 7/27 U.S. regained possession
- Standard Time Meridian $142^{\circ}30'$ to 1912
- 1912, 10/1 Standard Time Meridian changed to $150^{\circ}E00'$
- No Daylight Savings Time observed

HOWLAND ISLAND. See Baker.

JARVIS ISLAND. See Baker.

JOHNSTON ISLAND

Non-Self-Governing U.S. Territory

An island in the North Pacific about 1,200 miles S.W. of Hawaii

- 1807 Discovered by Capt. Charles James Johnston, a Britisher.
- 1858 Claimed by Hawaii
- Later became a U.S. possession
- Standard Time Meridian: $157^{\circ}W30'$

KINGMAN REEF

Non-Self-Governing U.S. Territory

The smallest land of U.S. sovereignty, it is located about 1,000 miles S. of Hawaii

- 1853, Nov. Discovered by Capt. W. E. Kingman
- Later became a U.S. possession
- Standard Time Meridian: $157^{\circ}W30'$

LADRONES ISLANDS. See Trust Territories.

MARIANA ISLANDS. See Trust Territories.

MARSHALL ISLANDS. See Trust Territories.

MIDWAY ISLANDS

Non-Self-Governing U.S. Territory

Two islands, Pearl and Hermes Reef, in the North Pacific, located 1,200 miles W.N.W. of Hawaii.

1859, 7/5 Discovered by N. C. Brooks for the U.S.

1867, 9/30 Formally declared a U.S. possession

Former Standard Time Meridian: 157°W30'

1947, 6/8 Standard Time Meridian of 150°W00' adopted

NAVASSA ISLAND

Non-Self-Governing U.S. Territory

An island in the Caribbean Sea between Jamaica and Haiti. Aids navigation with its lighthouse.

Standard Time Meridian: 75°W00'

PALMYRA ISLAND

Non-Self-Governing U.S. Territory

A small island just S.E. of Kingman Reef in the North Pacific Ocean

Standard Time Meridian: 157°W30'

PHILIPPINE ISLANDS

Former U.S. Territory

Located in the Western Pacific Ocean about 500 miles S.E. of Asia, they form an archipelago running 1,152 miles north and south.

1521 Discovered by Magellan

1565 Conquered by Spain

1572 Manila established

1600 Spain possessed most of the islands

1762 Brief British occupation

1763 Relinquished to Spain

1896 Strong insurrection

PHILIPPINE ISLANDS (Cont.)

- 1898, 12/10 Ceded to the U.S. by the Treaty of Paris, following the Spanish-American War, the U.S. paying for the territory.
- 1946, 7/4 The independent Republic of the Philippines was proclaimed in accordance with the Tydings-McDuffie Act passed by the U.S. Congress in 1934, providing for Philippine Independence in 1946.
- LMT to 1899
- 1899, 5/11 Standard Time Meridian of 120°E00' adopted

PUERTO RICO

Self-Governing Commonwealth

Located at the N.E. end of the Caribbean Sea

- 1493 Discovered by Columbus on his second voyage when it became a Spanish property
- 1898, 12/10 Spain ceded it to the U.S.
- 1952, 7/25 Elevated to the status of a free commonwealth associated with the U.S.
- LMT to 1899
- 1899, 3/28 Standard Time Meridian of 60°W00' adopted
- No Daylight Savings Time observed

RYUKYU ISLANDS

Under U.S. Administration

Some 64 islands stretching in a 500-mile arc from Southern Japan to Taiwan (Formosa)

- 1874 Annexed by Japan
- 1945, 4/1 Okinawa seized by the U.S. and occupied ever since
- 1951, 9/8 U.S. Administration by Treaty of San Francisco
- 1952, 4/28 Administration of islands vested in U.S. by Japanese peace treaty (1951) with Japan retaining "residual sovereignty". Okinawa, the largest of these islands, is the site of a huge U.S. military base even though the Ryukyu is a State of Japan. It serves as a depot of war supplies slated for Vietnam (1966).

Standard Time Meridian: 135°E00'

SAND ISLAND

Non-Self-Governing U.S. Territory

An island in the North Pacific near Johnston Island, about 1,200 miles S.W. of Hawaii

- 1857, 9/30 U.S. occupation

Standard Time Meridian: 157°W30'

SWAN ISLANDS

Non-Self-Governing U.S. Territory

Two small islands in the Caribbean Sea about 100 miles N.E. of Honduras. Great Swan is used by the U.S. Weather Bureau and Federal Aviation Agency. Little Swan is uninhabited.

Standard Time Meridian: $90^{\circ}\text{W}00'$

TRUST TERRITORIES OF THE PACIFIC

2,000 islands (many only tiny coral reefs) in the Western Pacific Ocean, including the Caroline, Marshall and Mariana Islands (except Guam), formerly under Japanese Mandate.

1947, 4/2 The Security Council of the United Nations placed these islands under the trustee system.

1947, 7/18 Became trustee of the U.S.

MARIANA ISLANDS (LADRONES ISLANDS)

Located S. of Japan and E. of the Philippines. These islands include Guam (see above), Rota, Saipan, Tinian, Pagan, Guguan, Agrihan and Aguijan.

Standard Time Meridian: $135^{\circ}\text{W}00'$

CAROLINE ISLANDS

Located E. of the Philippines and S. of the Marianas, these islands include the Yap, Truk and the Palau Groups and the islands of Ponape and Kusaie, as well as many coral atolls.

Former Standard Time Meridian: $155^{\circ}\text{E}00'$

In recent years the Standard Time Meridian was changed to $150^{\circ}\text{E}00'$ for the Eastern Carolines and $135^{\circ}\text{E}00'$ for the Western Carolines

MARSHALL ISLANDS

Located E. of the Carolines. These islands are divided into two chains:

Western or RALIK group includes atolls of Jaluit, Kwajalein, Wotho, Bikini and Eniwetok. Bikini and Eniwetok have been the scene of several atomic-bomb tests.

Eastern or RATAK group includes the atolls of Mili, Majuro, Maloelap, Wotje and Likiep.

Standard Time Meridian: $150^{\circ}\text{E}00'$

VIRGIN ISLANDS of the U.S.

Non-Self-Governing U.S. Territory

A chain of islands straight E. of Puerto Rico separating the Caribbean Sea and the Atlantic Ocean

- | | |
|-------------|---|
| 1493 | Discovered by Columbus |
| 1898, 12/10 | Culebra and Vieques Islands ceded to the U.S. by Spain |
| 1917, 1/25 | The three largest islands, St. Croix, St. Thomas and St. John and 50 or so smaller islands (formerly Danish West Indies) purchased from Denmark by the U.S. |

Standard Time Meridian: 60°W00'

No Daylight Savings Time observed

WAKE ISLAND

Non-Self-Governing U.S. Territory

With sister islands, Wilkes and Peale, lies in the North Pacific Ocean on the direct route from Hawaii to Hong Kong.

- | | |
|-------------|---------------------------------------|
| 1796 | Discovered by the British |
| 1898, 7/4 | The U.S. Flag hoisted over the Island |

| 1945, 9/4 | U.S. regained possession |

Standard Time Meridian: 180°E00'

Public Law 89-387
89th Congress, S. 1404
April 13, 1966

An Act

To promote the observance of a uniform system of time throughout the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Uniform Time Act of 1966".

Sec. 2. It is the policy of the United States to promote the adoption and observance of uniform time within the standard time zones prescribed by the Act entitled "An Act to save daylight and to provide standard time for the United States", approved March 19, 1918 (40 Stat. 450; 15 U.S.C. 261-264), as modified by the Act entitled "An Act to transfer the Panhandle and Plains section of Texas and Oklahoma to the United States standard central time zone", approved March 4, 1921 (41 Stat. 1446; 15 U.S.C. 265). To this end the Interstate Commerce Commission is authorized and directed to foster and promote widespread and uniform adoption and observance of the same standard of time within and throughout each such standard time zone.

Sec. 3. (a) During the period commencing at 2 o'clock antemeridian on the last Sunday of April of each year and ending at 2 o'clock antemeridian on the last Sunday of October of each year, the standard time of each zone established by the Act of March 19, 1918 (15 U.S.C. 261-264), as modified by the Act of March 4, 1921 (15 U.S.C. 265), shall be advanced one hour and such time as so advanced shall for the purposes of such Act of March 19, 1918, as so modified, be the standard time of such zone during such period; except that any State may by law exempt itself from the provisions of this subsection providing for the advancement of time, but only if such law provides that the entire State (including all political subdivisions thereof) shall observe the standard time otherwise applicable under such Act of March 19, 1918, as so modified, during such period.

(b) It is hereby declared that it is the express intent of Congress by this section to supersede any and all laws of the States or political subdivisions thereof insofar as they may now or hereafter provide for advances in time or changeover dates different from those specified in this section.

(c) For any violation of the provisions of this section the Interstate Commerce Commission or its duly authorized agent may apply to the district court of the United States for the district in which such violation occurs for the enforcement of this section; and such court shall have jurisdiction to enforce obedience thereto by writ of injunction or by other process, mandatory or otherwise, restraining against further violations of this section and enjoining obedience thereto.

Sec. 4. (a) The first section of the Act of March 19, 1918, as amended (15 U.S.C. 261), is amended to read as follows:

"That for the purpose of establishing the standard time of the United States, the territory of the United States shall be divided into eight zones in the manner provided in this section. Except as provided in section 3(a) of the Uniform Time Act of 1966, the standard time of the first zone shall be based on the mean solar time of the

Uniform Time
Act of 1966.

80 STAT. 108

Pub. Law 89-387

- 2 -

April 13, 1966

"Interstate or
foreign commerce."

15 USC 262.

Designations.

60 Stat. 237.

Effective date.

sixtieth degree of longitude west from Greenwich; that of the second zone on the seventy-fifth degree; that of the third zone on the ninetieth degree; that of the fourth zone on the one hundred and fifth degree; that of the fifth zone on the one hundred and twentieth degree; that of the sixth zone on the one hundred and thirty-fifth degree; that of the seventh zone on the one hundred and fiftieth degree; and that of the eighth zone on the one hundred and sixty-fifth degree. The limits of each zone shall be defined by an order of the Interstate Commerce Commission, having regard for the convenience of commerce and the existing junction points and division points of common carriers engaged in interstate or foreign commerce, and any such order may be modified from time to time. As used in this Act, the term 'interstate or foreign commerce' means commerce between a State, the District of Columbia, the Commonwealth of Puerto Rico, or any possession of the United States and any place outside thereof."

(b) Section 2 of such Act is amended to read as follows:

"Sec. 2. Within the respective zones created under the authority of this Act the standard time of the zone shall insofar as practicable (as determined by the Interstate Commerce Commission) govern the movement of all common carriers engaged in interstate or foreign commerce. In all statutes, orders, rules, and regulations relating to the time of performance of any act by any officer or department of the United States, whether in the legislative, executive, or judicial branches of the Government, or relating to the time within which any rights shall accrue or determine, or within which any act shall or shall not be performed by any person subject to the jurisdiction of the United States, it shall be understood and intended that the time shall insofar as practicable (as determined by the Interstate Commerce Commission) be the United States standard time of the zone within which the act is to be performed."

(c) Section 4 of such Act is amended to read as follows:

"Sec. 4. The standard time of the first zone shall be known and designated as Atlantic standard time; that of the second zone shall be known and designated as eastern standard time; that of the third zone shall be known and designated as central standard time; that of the fourth zone shall be known and designated as mountain standard time; that of the fifth zone shall be known and designated as Pacific standard time; that of the sixth zone shall be known and designated as Yukon standard time; that of the seventh zone shall be known and designated as Alaska-Hawaii standard time; and that of the eighth zone shall be known and designated as Bering standard time."

Sec. 5. The Administrative Procedure Act (5 U.S.C. 1001-1011) shall apply to all proceedings under this Act, the Act of March 19, 1918 (15 U.S.C. 261-264), and the Act of March 4, 1921 (15 U.S.C. 265).

Sec. 6. This Act shall take effect on April 1, 1967; except that if any State, the District of Columbia, the Commonwealth of Puerto Rico, or any possession of the United States, or any political subdivision thereof, observes daylight saving time in the year 1966, such time shall advance the standard time otherwise applicable in such place by one hour and shall commence at 2 o'clock antemeridian on the last Sunday in April of the year 1966 and shall end at 2 o'clock antemeridian on the last Sunday in October of the year 1966.

Sec. 7. As used in this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, or any possession of the United States.

Approved April 13, 1966.

Standard time
zones.

80 STAT. 108.

VII 1966 TIME PICTURE

Before the Uniform Time Act of 1966 became law, communities and states observing Daylight Saving Time did so on the months, days and hours that suited their own convenience. Formerly, the only periods when ALL of the States observed "fast time" was during the two World Wars. See TIME REFERENCE TABLES for dates.

Putting an end to the confusion of switchover dates, the 1966 Time Act stated that if Daylight Saving Time was observed that year, it must be observed from April 24 to October 30, with switchovers at 2:00 A.M. As the law reads, the option of observing or not observing Daylight Saving Time still remained a state and local matter during 1966. However, more uniformity is seen in the time picture beginning with 1967. See A LOOK INTO THE FUTURE.

The 1966 rundown of the Daylight Saving Time picture in the 50 States still revealed some confusion. Nevertheless, these time factors may be classified three ways:

- (1) 14 States not observing Daylight Saving Time.
- (2) 19 States and District of Columbia observing Daylight Saving Time state-wide.
- (3) 17 States observing Daylight Saving Time in some portions.

States Not Observing Daylight Saving Time:

Alaska	Florida	Louisiana	Oklahoma
Arizona	Georgia	Mississippi	South Carolina
Arkansas	Hawaii	North Carolina	Texas
		North Dakota	Wyoming

States Observing Daylight Saving Time State-wide from April 24 to October 30:

California	Illinois	Nevada	Rhode Island
Colorado	Iowa	New Hampshire	Vermont
Connecticut	Maine	New Jersey	Washington
Delaware	Maryland	New York	West Virginia
District of Columbia	Massachusetts	Pennsylvania	Wisconsin

Portions of States Observing Daylight Saving Time from April 24 to October 30:

Alabama	-- Communities in Chambers and Lee Counties, and Fort Rucker in Coffee and Dale Counties.
Idaho	-- Communities north of Salmon River. Coeur d'Alene and Moscow and their surrounding communities.
Indiana	-- Located in two time zones. Entire State was on equivalent of Eastern Standard Time. (49 Counties in the western part of the State which observe Central Standard Time switched to Central Daylight Saving Time.) See Indiana Map Section in <u>TIME REFERENCE TABLES</u> .
Kansas	-- All or portions of 25 counties in northwestern part of the State.
Kentucky	-- A number of communities in northwestern part of the State, including Owensboro.
Michigan	-- Communities in Upper Peninsula, including Dickinson County and the City of Ironwood.
Minnesota	-- State-wide, with the exception of a few communities on the western State border.
Missouri	-- Some 50 communities in the eastern part of the State, including St. Louis.
Montana	-- Butte and Anaconda Company and plant area in Anaconda.

Nebraska -- Several counties in the southwest part of the State remain on Mountain Standard Time all year round.

New Mexico -- Los Alamos County and some communities in Quay County.

Ohio -- About 240 communities. In the northeastern part of the State in about 18 counties, including Akron, Canton, Cleveland and Youngstown; and some communities in the eastern and southeastern part of the State. In the residential community of Barnesville, only half of the residents observe Daylight Saving Time. This is because factory areas to its east go on "fast time" while those to the west stay on "slow time." Barnesville business and banks observe Daylight Saving Time. However, schools and the City government remain on Eastern Standard Time.

- Oregon -- All of the State except a small area of communities at the eastern border, which observe Mountain Standard Time.
- South Dakota -- Portions of Mellette, Stanley, and Todd Counties, including half of the community of Hayes.
- Tennessee -- A portion of Marion County.
- Utah -- Northwestern portion of State located in the Pacific Standard Time Zone.
- Virginia -- All but 8 counties in the southwestern portion of the State. These 8 counties remain on Eastern Standard Time: Buchanan, Dickenson, Lee, Russell, Scott, Smyth, Washington and Wise.

Local authorities may be consulted to determine the exact 1966 Daylight Saving Time status of any community listed in this section.

"DAYLIGHT SAVING TIME IN REVERSE" is a phrase occasionally used by those who write or talk on time. An explanation here will round out the list of popular terms applied to U.S. time changes.

States observing Daylight Saving Time in reverse are parts of North Dakota and Texas. However, both States observe Standard Time year-round. But the El Paso area in Texas and the northwest quadrant of North Dakota are one hour behind the Standard Time observed in the remaining part of the State. This is called Daylight Saving Time in reverse. See North Dakota and Texas maps in TIME REFERENCE TABLES.

VIII A LOOK INTO THE FUTURE: 1967-2000

Starting in 1967, the Uniform Time Act of 1966 commenced automatic nationwide Daylight Saving Time from the last Sunday in April to the last Sunday in October with all switchovers, both beginning and ending dates, throughout the United States at 2:00 A.M. In this Public Law No. 89-387, the word "States" includes the District of Columbia, the Commonwealth of Puerto Rico, or any of the Possessions of the United States. For a listing see UNITED STATES POSSESSIONS, TERRITORIES AND TRUSTEESHIPS.

A state may vote to exempt itself and stay on Standard Time. But the entire state must go one way or the other. Failure of a state to take legal action puts it on Daylight Time automatically. If these conditions hold in the future, we will not be plagued with the numerous deviations which appear in the local ordinance exceptions listed in the TIME REFERENCE TABLES.

Newspapers and news magazines issued during late April each year usually feature an article covering time changes all over the United States. They will undoubtedly list the states which by legislative action exempt themselves from observing Daylight Saving Time in a particular year. (By noting such information this book can be kept up to date.)

Unless a major change occurs in future years, simply consult the following table to learn the exact Daylight Saving Time observance dates for any year from 1967 to 2000. The last Sunday in April and the last Sunday in October are given for each year.

DAYLIGHT SAVING TIME DATES: 1967-2000

Year	Sundays	Year	Sundays	Year	Sundays	Year	Sundays
1967	4/30-10/29	1975	4/27-10/26	1983	4/24-10/30	1992	4/26-10/25
1968	4/28-10/27	1976	4/25-10/31	1984	4/29-10/28	1993	4/25-10/31
1969	4/27-10/26	1977	4/24-10/30	1985	4/28-10/27	1994	4/24-10/30
1970	4/26-10/25	1978	4/30-10/29	1986	4/27-10/26	1995	4/30-10/29
1971	4/25-10/24	1979	4/29-10/28	1987	4/26-10/25	1996	4/28-10/27
1972	4/30-10/29	1980	4/27-10/26	1988	4/24-10/30	1997	4/27-10/26
1973	4/29-10/28	1981	4/26-10/25	1989	4/30-10/29	1998	4/26-10/25
1974	4/28-10/27	1982	4/25-10/31	1990	4/29-10/28	1999	4/25-10/31
				1991	4/28-10/27	2000	4/30-10/29

These new Daylight Saving Time regulations eliminate some of the confusion out of the chaotic patchwork of time. But is our time schizophrenia a thing of the past? Maybe not! It all depends upon the States which opposed the new law. When they objected, they were advised that they could petition the Interstate Commerce Commission for a revision in their Time Zones.

In the main, the objecting States are those which have the complication of being located either in two Time Zones or on a Time Zone boundary-line. For some examples, see Michigan, Indiana, Kansas, Missouri, Minnesota and Alaska (with its arctic summer) in the TIME REFERENCE TABLES.

If these objections foreshadow Time Zone shifts, even with the new time act that insures uniform dates for Daylight Time, alertness will still be required by the time researcher to note changes in the U.S.A. Time picture.

The shifts will be regulated by the Interstate Commerce Commission, and no longer will informal time of another Time Zone be observed on the whim of some local group. Should there be future Time Zone shifts, the I.C.C. reports may be found in the Public Library, and undoubtedly these changes will be reported in the press. Thus the Standard Time reference in this book can be kept abreast of the times.

As this century approaches its fourth quarter, man has come a long way in solving the riddle of time. His quartz-controlled clocks can accurately determine a 20-millionth of a second; his calendar is in pretty good shape; and he is to be congratulated for his late adoption of the uniform observance of Daylight Time.

IX SUGGESTED TIME REFERENCE SOURCES:

Many sources were contacted to provide the vast amount of data upon which the TIME REFERENCE TABLES are based. Space does not permit giving a complete bibliography. That would require listing every State Attorney General, Secretary of State, Community and State Chamber of Commerce, etc. Because there are omissions in the TIME REFERENCE TABLES, certain communities will require further investigation. To save the time researcher endless hours in tracking down unknown factors, the following reference list is presented as a helpful aid.

- Chamber of Commerce, State & Community

P.A.I. Approved Text—1969 Supplement to No. 1.

NOTICE

This Supplement is intended to accompany, and to be used in conjunction with, *TIME CHANGES IN U.S.A.* published in 1966. The data in this Supplement brings this book up to date, as of 1969, by supplying additional data from 1966 to 1969 inclusive.

This Supplement also contains important information regarding the recording of vital statistics. Listed State by State, it should be consulted in conjunction with the information contained in the original edition.

Please note that there have been several shifts of Time Zone Boundary-Lines in the U.S.A. since the book was published.

CONTENTS

- IV Recording of Vital Statistics

PRINTED IN THE UNITED STATES OF AMERICA

GRAPHIC ARTS PRESS
DOWNEY, CALIFORNIA 90241

I — ADDENDA

NEW JERSEY —

Clifton observed Daylight Saving Time from 1922 to date. See tables on pages 94 and 171 for dates. Changes at 2:00 a.m.

CONNECTICUT —

Termination of World War II Time in 1945 should read: 1945, 12/31 at 2400 hours.

II — RELOCATION OF TIME ZONE BOUNDARY-LINES

ALASKA —

1967, 11/25 New Standard Time Zone Boundary-Lines established:

- (1) YST (Yukon Standard Time) 135°W
Extends from 127W30 to 141W00
- (2) AHST (Alaska-Hawaii Standard Time) 150°W
Extends from 141W00 to 157W30
- (3) BST (Bering Standard Time) 165°W
Extends from 157W30 to 172W30

NOTE: CAT (Central Alaska Time) is replaced by AHST above; NT (Nome Standard Time) is replaced by BST above.

HAWAII —

1967, 11/25 New Time Zone Name:
AHST (Alaska-Hawaii Standard Time) 150°W
Extends to entire State.

NOTE: Formerly used CAT (Central Alaska Time) or HST (Hawaii Standard Time), now called AHST as above.

INDIANA —

1969, 1/1 Relocation of Eastern and Central Time Zone Boundary. Until this date 29 counties observed CST and 43, EST. The whole State went into the Eastern Time Zone with the exception of 12 counties clustered in the northwest and southwest corners of the State bordering on Illinois.

KANSAS —

1967, 11/25 Boundary between MST and CST Zones moved to coincide with the western boundary of the State, placing entire State in the Central Standard Time Zone.

MICHIGAN —

Grand Marais, small town in Upper Peninsula adopted Eastern Standard Time (75°W) December 10, 1967 at 0 hour.

NEBRASKA —

1968, 1/1 Relocation of Central and Mountain Time Zone Boundary. Until this date the boundary split several counties. The new arrangement conforms with county Boundary-Lines thus:

CST Counties

Blaine
Brown
Hayes
Hitchcock
Keyapaha
Lincoln
Logan
McPherson
Thomas

MST Counties

Arthur
Chase
Cherry
Dundy
Hooker
Keith
Perkins

NORTH DAKOTA —

1967, 11/25 Boundary between MST and CST moved east to include within the Mountain Standard Time Zone those counties which have historically observed MST.

PUERTO RICO —

1967, 11/25 Officially placed on Atlantic Standard Time (60°W) which had been observed in parts since 1899.

TEXAS —

El Paso adopted Mountain Standard Time (105°W) May 17, 1970 at 2:00 a.m.

VIRGIN ISLANDS —

1967, 11/25 Atlantic Standard Time (60°W), adopted.

III — DAYLIGHT SAVING TIME OBSERVANCE

Under the Uniform Time Act of 1966, Daylight Saving Time became effective in all States, District of Columbia, U.S. Possessions, or any political subdivisions, unless State Legislatures voted exemption for the entire State.

1967, 4/30 — 10/29
Daylight Saving Time observed
Changes at 2:00 a.m.

ALASKA, HAWAII and MICHIGAN remained on Standard Time. (See Michigan below.)

INDIANA — Legislature enacted a law requiring one clock in the Capitol and in each courthouse or city hall to be marked "official time" in compliance with the federal act. But it left residents free to observe whatever time was set by local ordinance.

The Indiana statute also prohibited the 43 counties in the Eastern Time Zone from observing Daylight Saving Time. These counties remained on Eastern Standard Time year round.

Some of the Central Time Zone counties ignored the act and moved their clocks up an hour during the summer to conform with Indianapolis, the capitol.

But Lake County, in the northwestern corner of the State and close to Chicago, moved its clocks ahead to Daylight Saving Time. Union City, across the State on the Ohio boundary, also went on Daylight Saving Time.

KENTUCKY — In 1967, State got a year of grace because its legislature had not met since the Uniform Time Act was passed on April 13, 1966 and would not convene until January, 1968. Some towns observed Daylight Saving Time voluntarily. The result was that the State had four different times, as it straddles the line between Eastern and Central Time Zones.

MICHIGAN — Even though this State voted exemption from Daylight Saving Time, confusion reigned. After a long battle, State adopted Daylight Saving Time at 12:01 a.m., June 14, 1967. But the Upper Peninsula rebelled and kept to Standard Time, except the county of Chippewa, which switched to Daylight Saving Time with the rest of the State.

1968, 4/28 — 10/27
Daylight Saving Time observed
Changes at 2:00 a.m.

ALASKA, ARIZONA and HAWAII remained on Standard Time.

INDIANA followed a schedule similar to that of 1967.

MICHIGAN — Grand Marais, Michigan, located in Upper Peninsula, adopted Eastern Standard Time at 0 hours, December 10, 1967 in defiance of the federal time act.

1969, 4/27 — 10/26
Daylight Saving Time observed
Changes at 2:00 a.m.

ARIZONA, HAWAII and MICHIGAN remained on Standard Time.

1970, 4/26 — 10/25
Daylight Saving Time observed
Changes at 2:00 a.m.

ARIZONA, HAWAII and MICHIGAN remained on Standard Time.

1971, 4/25 — 10/31
Daylight Saving Time observed
Changes at 2:00 a.m.

ARIZONA, HAWAII and MICHIGAN remained on Standard Time.

1972, 4/30 — 10/29
Daylight Saving Time observed
Changes at 2:00 a.m.

ARIZONA, HAWAII and MICHIGAN remained on Standard Time.

INDIANA voted exemption from Daylight Saving Time, except for the 12 counties in the Central Time Belt clustered in the northwest and southwest corners of the State adjoining Illinois.

IV — RECORDING OF VITAL STATISTICS

According to the United States Department of Health, Education, and Welfare, the time of birth was included on all of the U.S. Standard Certificates of Live Birth recommended for adoption by the States from 1900 until 1949. This item was omitted from the 1949 and 1956 revisions of this certificate, but was

added once again to the 1968 revision which is still in effect.

If all of the States had followed this procedure, we would find a uniform pattern. However, as the State list in this section shows, all States did not comply with this request.

Some State Legislatures have passed bills requiring the Board of Health to adopt specific forms for the recording of vital statistics, such as births, stillbirths and deaths. Other States have no legislation whatsoever. In still other States, the Board of Health is empowered to adopt their own forms. Not only that, in some instances, there have been changes in these forms from time to time. That is, for a certain number of years the birth hour was required and a space was provided for its recording. Yet, the failure to fill this requirement (birth hour) on the form did not prevent the recording of the birth. During a number of years there was no space for the birth hour, and later that space was returned to the forms. Finally, some States have never provided a space for the birth hour.

Persons who need to refer to birth certificates as part of their work or research would read with interest the various legislation regarding them. As an example of one State's regulations on records of vital statistics, the following is presented.

(Reproduced by the Colorado State
Department of Public Health)

CHAPTER 66 **ARTICLE 8**

VITAL STATISTICS

Article 8 of Chapter 66, Colorado Revised Statutes 1963, as amended in 1966, was Repealed and Re-enacted, with Amendments — Senate Bill #383, 1967.

- 66-8-1. Short Title.
- 66-8-2. Definitions.
- 66-8-3. Centralized registration system for all vital statistics.
- 66-8-4. Registration of vital statistics.
- 66-8-5. Vital Statistics, reports, and certificates — forms and information to be included.
- 66-8-6. Reports of marriage.
- 66-8-7. Reports of adoption, divorce, paternity and other court proceedings affecting vital statistics.
- 66-8-8. Reports and certificates as to births and deaths.
- 66-8-9. Local registration districts for processing of birth and death certificates.
- 66-8-10. Certificates of death.
- 66-8-11. Dead bodies — disposition, removal from state, records.
- 66-8-12. Certificates of birth.
- 66-8-13. New certificates of birth following adoption, legitimation, and paternity determination.
- 66-8-14. Delayed registration of births and deaths.
- 66-8-15. Alteration of reports and certificates; amended reports and certificates.

- 66-8-16. Institutions to keep records; persons to furnish information.
- 66-8-17. Certified copies furnished — fee.
- 66-8-18. Penalties.
- 66-8-19. Tax on court action affecting vital statistics.
- 37-13-4. Original civil jurisdiction.
- 35-6-6. Coroner's inquest — jury — certificates of death.
- 35-6-9. Physicians summoned — compensation.
- 113-1-12. Public records free to servicemen.

66-8-1. SHORT TITLE —

This article may be cited as the "Vital Statistics Act".

66-8-2. DEFINITIONS —

- (1) As used in this article, unless the context otherwise requires:
- (2) "Regulations" means regulations duly adopted pursuant to section 66-8-3.
- (3) "Vital statistics report" means any report required by section 66-8-6, 66-8-7, or 66-8-8.
- (4) "Vital statistics certificate" means any certificate required by section 66-8-10 or 66-8-12.
- (5) "Institution" means any establishment which provides in-patient medical, surgical, or diagnostic care or treatment, or nursing, custodial, or domiciliary care, to two or more unrelated individuals, or to which persons are committed by law.
- (6) "Fetal death" means death prior to the complete expulsions or extraction from its mother of a product of human conception, irrespective of the duration of pregnancy. The death is indicated by the fact that after such expulsion or extraction the fetus does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.
- (7) "Dead body" means a lifeless human body or parts of such body or bones thereof from the state of which it reasonably may be concluded that death recently occurred.

66-8-3. CENTRALIZED REGISTRATION SYSTEM FOR ALL VITAL STATISTICS —

In order to provide for the maintenance of a centralized registry of the vital statistics of this state, the office of state registrar of vital statistics is hereby created in the division of administration of the state department of public health. The state registrar shall be appointed by the state board, shall have such staff and clerical help as reasonably may be required in the performance of his duties, and the state registrar and his staff and clerical help shall be subject to the constitution and civil service laws of the state. The state board of public health shall adopt, promulgate, amend and repeal such rules and regulations and orders in accordance with the provisions of section 3-16-2, C.R.S. 1963, as are necessary and proper for carrying out the provisions of this article. The state registrar shall direct and supervise the operation of the vital statistics system, prepare and publish annual reports of vital statistics, and administer and enforce the provisions of this article and all rules and regulations issued hereunder. Federal, state, local, and

other public or private agencies may, upon request, be furnished copies of records of data for statistical purposes upon such terms and conditions as may be prescribed by regulation. The state registrar may delegate such functions and duties vested in him to his staff and clerical help and to the local registrars as he deems necessary or expedient.

66-8-4. REGISTRATION OF VITAL STATISTICS —

Promptly upon receipt of each and every vital statistics report or certificate from a county clerk, a court clerk, or a local registrar, the state registrar shall examine it to determine that it has been properly completed. If the report has been properly completed the state registrar shall register the statistical event described therein by noting on the report the date the report has been accepted as having been properly completed, and certifying thereon that it is registered and placing the same in the permanent files of the office. If not properly completed the state registrar shall take such action with respect thereto as may be required by applicable regulations.

66-8-5. VITAL STATISTICS, REPORTS, AND CERTIFICATES—FORMS AND INFORMATION TO BE INCLUDED —

The state board shall specify the information to be included in each type of vital statistical report and certificate required by this article and the division shall provide the necessary forms, but in no event shall any information be required in reports of court decrees or reports of marriages, births, or deaths that is not contained in such decrees or in the certificates pertaining to such marriages, births, and deaths. In order to assist in the promotion and maintenance of uniformity throughout the various states, the state board shall give consideration to, but not be limited by the items recommended by the federal agency responsible for a national system of vital statistics.

66-8-6. REPORTS OF MARRIAGE —

Each county clerk and recorder shall prepare a report containing such information and using such form as may be prescribed and furnished by the state registrar, with respect to every duly executed marriage certificate that is returned in accordance with section 90-1-12 (2), C.R.S. 1963. On or before the tenth day of each month, or more frequently if so requested by the state registrar, such clerk and recorder shall forward to the state registrar all such marriage reports for all marriage certificates returned in the preceding period. Certified copies of marriage certificates may be issued by any clerk and recorder pursuant to section 90-1-20, C.R.S. 1963.

66-8-7. REPORTS OF ADOPTION, DIVORCE, PATERNITY AND OTHER COURT PROCEEDINGS AFFECTING VITAL STATISTICS —

The clerk of each court shall prepare a report containing such information and using such form as may be prescribed and furnished by the state registrar, with respect to every decree entered by the court with respect to paternity, legitimacy, adoption, change of name, divorce, separate maintenance, and

annulment of marriage, and every decree amending or nullifying such a decree, and also with respect to every decree entered pursuant to section 66-8-14. On or before the tenth day of each month, or more frequently if so requested by the state registrar, such clerk shall forward to the state registrar the reports for all such decrees entered during the preceding period as well as the sum of one dollar for each such report.

66-8-8. REPORTS AND CERTIFICATES AS TO BIRTHS AND DEATHS –

Each local registrar who receives a birth or death certificate shall prepare a report with respect thereto, using such form as may be prescribed by the state registrar, and shall keep all such reports as part of such local registrar's permanent files. On or before the tenth day of each month, or more often if so requested by the state registrar, each such local registrar shall forward to the state registrar all of the original birth and death certificates received during the preceding period.

66-8-9. LOCAL REGISTRATION DISTRICTS FOR PROCESSING OF BIRTH AND DEATH CERTIFICATES –

(1) In order to facilitate the processing of certificates and reports pertaining to births and deaths, the state board shall divide the state into local registration districts and from time to time may modify, consolidate, or subdivide the same. There shall be a local registration district. In the event the local registration district is coterminous with a district or county health department organized under either article 2 or article 3 of this chapter, the health officer of such district shall be the local registrar; otherwise the state registrar shall appoint and remove the local registrar in each district.

(2) The local registrar shall require that birth and death certificates be completed and filed in accordance with provisions of this article and rules and regulations issued hereunder, and shall maintain such records, make such reports, and perform such other duties as from time to time may be required. Records of local registrars shall be maintained in such manner and at such places as shall be specified by regulation.

(3) Deputy local registrars to assist local registrars in the performance of their duties may be appointed and removed. In the event the local registration district is coterminous with a district or county health department organized under either article 2 or article 3 of this chapter, appointment and removal shall be accomplished by the local registrar; otherwise by the state registrar.

(4) The state registrar shall certify quarterly to the treasurer of each county and name and address of each deputy local registrar and the number of birth and death certificates pertaining to such county and processed by each such person during the preceding quarter. Upon approval of the proper auditing official of such county, each such local registrar and deputy local registrar shall be entitled to the sum of fifty cents for each such certificate so processed and fifty cents if no certificate has been so transmitted, but no

compensation shall be paid under this section to any full-time employee of the state or of any political subdivision thereof.

66-8-10. CERTIFICATES OF DEATH –

(1) Within three days after a death of a person or delivery of a dead fetus, and within three days after discovery thereof if the time or place of such death or delivery is unknown, a death certificate with respect thereto shall be filed with the local registrar of the local registration district in which such death or delivery occurred or, if such facts are unknown, in the local registration district in which the body or fetus was found. If the death or delivery occurred in a moving conveyance, the certificate shall be filed in the local registration district in which the body or fetus was first removed from such conveyance.

(2) The funeral director or person acting as such who first assumes custody of a dead body or dead fetus shall be responsible for the filing of the death certificate required by subsection (1) of this section. He shall obtain the personal data required by the certificate from the next of kin or the best qualified person or source available. He shall obtain completion of the portion of the certificate pertaining to the cause of death within twenty-four hours after the death or delivery of the dead fetus by the physician in charge with respect to the illness or condition which resulted in the death or delivery of the dead fetus, but if the death or delivery occurred without such medical attendance, the county coroner shall be notified by the funeral director or any other person having knowledge of such death or delivery and the coroner shall complete the medical certification.

66-8-11. DEAD BODIES – DISPOSITION, REMOVAL FROM STATE, RECORDS –

(1) Any person requested to act as funeral director for a dead body or otherwise whoever assumes custody of a dead body shall, within seventy-two hours after death or discovery of such body, obtain a disposition or removal permit therefor from the local registrar of the local registration district in which the death occurred or the body was found and no body shall be buried, cremated, deposited in a vault or tomb, or otherwise disposed of, nor shall any body be removed from this state until such a disposition or removal permit has been obtained. The local registrar of a local registration district in which a death has occurred or a body been found shall issue either a disposition or removal permit as requested, but only upon receipt of a death certificate or a removal permit issued under authority of another state or under such other circumstances as may be specified by regulations.

(2) A disposition permit issued under the law of another state which accompanies a dead body or fetus brought into this state shall be authority for final disposition of the body or fetus in this state.

(3) Within five days following the final disposition of any dead body or fetus in this state the disposition

permit therefor shall be filed with the local registrar of the local registration district in which such disposition occurred.

(4) Any person who removes from the place of death or transports or finally disposes of a dead body or fetus, in addition to filing any certificate or other form required by this article, shall keep a record which shall identify the body, and such information pertaining to his receipt, removal, and delivery of such body as may be prescribed in regulations. Such record shall be retained for a period of not less than seven years and shall be made available for inspection by the state registrar or his representative upon demand.

66-8-12. CERTIFICATES OF BIRTH —

(1) A certificate of birth for each live birth which occurs in this state shall be filed with the local registrar of the district in which the birth occurs within seven days after such birth. When a birth occurs on a moving conveyance the birth certificate shall be filed in the district in which the child was first removed from the conveyance. Either of the parents of the child shall sign the certificate to attest to the accuracy of the personal data entered thereon in time to permit its filing within such seven day period.

(2) When a birth occurs in an institution, the person in charge of the institution or his designated representative shall obtain the personal data, prepare the certificate, secure the signatures required by the certificate, and file it with the local registrar; the physician in attendance shall certify to the facts of birth and provide the medical information required by the certificate within five days after the birth. When the birth occurs outside an institution, the certificate shall be prepared and filed by the physician in attendance at or immediately after birth, or in the absence of such a physician by any other person so attending, or in the absence of any person so attending by the father or mother, or in the absence of the father and the inability of the mother by the person in charge of the premises where the birth occurred.

(3) If the mother was married either at the time of conception or birth, the name of the husband shall be entered on the certificate as the father of the child unless paternity has been determined otherwise by a court of competent jurisdiction, in which case the name of the father as so determined shall be entered. If the mother was not married at the time of conception or birth, the name of the father shall be entered if, but only if, the mother and the person to be named as the father so request in writing or if paternity has been determined by a court of competent jurisdiction, in which case the name of the father as so determined shall be entered.

(4) Whoever assumes the custody of a living infant of unknown parentage shall report on a form and in the manner prescribed by the state registrar within seven days to the local registrar of the district in which the child was found, such information as the state registrar shall require, which report shall constitute the certificate of birth for the infant. The place where

the child was found shall be entered as the place of birth and the date of birth shall be determined by approximation. If the child is identified and a certificate of birth is found or obtained, any report registered under this section shall be sealed and filed and may be opened only by order of a court of competent jurisdiction or as provided by regulation.

66-8-13. NEW CERTIFICATES OF BIRTH FOLLOWING ADOPTION, LEGITIMATION, AND PATERNITY DETERMINATION —

(1) A new certificate of birth shall be prepared by the state registrar as to any person born in this state when, ever he receives with respect to such a person any of the following: A report concerning adoption, legitimacy or paternity as required by section 66-8-7; or a report or certified copy of a decree concerning the adoption, legitimacy, or paternity of such a person from a court of competent jurisdiction outside this state; or a certified copy of the marriage certificate of the parents together with a statement of the husband, executed after such marriage, in which the husband acknowledges paternity; but with respect to adoptions no new certificate of birth shall be prepared if the state registrar is requested not to do so by the court that has decreed the adoption, by an adoptive parent, or by the adopted person. Each new certificate shall show all information shown on the original certificate of birth except information for which substitute information is included as a result of the report or decree which prompts the preparation of the new certificate.

(2) The state registrar shall register each new certificate of birth prepared pursuant to subsection (1) of this section, by marking thereon the words "new certificate", by marking thereon the date such certificate is completed, which date thereafter shall be the registration date, and by substituting such new certificate for the original certificate of birth for such person.

(3) Thereafter the original certificate and evidence concerning adoption, legitimacy or paternity shall be sealed and not be subject to inspection except as provided by regulation or upon order of a court of competent jurisdiction after the court has satisfied itself that the interests of the child or of the child's descendants or the parents will best be served by opening said seal. The information obtained from opening said seal may be withheld from public view or from being presented as evidence at the discretion of the judge.

(4) In the event the decree which formed the basis for the new certificate of birth is annulled and if the state registrar receives either a certified copy of such decree of annulment or a report with respect to such decree as required by section 66-8-7 the state registrar shall return the original certificate to its place in the files. Thereafter the new certificate and evidence concerning the annulment shall not be subject to inspection except upon order of a court of competent jurisdiction or as provided by regulation.

66-8-14. DELAYED REGISTRATION OF BIRTHS AND DEATHS —

(1) When a birth, founding birth, death, or fetal death has occurred in this state but no certificate as to such event has been filed or registered in accordance with the provisions of section 66-8-10 or 66-8-12 a certificate as to such event may be accepted for filing or registration, or both, in accordance with applicable regulations concerning certificates that have not been timely or properly filed or registered. The state registrar shall endorse on the certificate a summary statement of the evidence submitted to substantiate the facts asserted in such certificate. If a certificate is not registered until more than a year after the event, the state registrar shall mark the word, "Delayed" on the face thereof.

(2) When the state registrar finds the certificate or such supplementary evidence as may be required by regulations to be deficient or invalid, the certificate shall not be registered and the person who requested the registration shall be advised in writing both as to the basis for the alleged deficiency or invalidity and also as to such person's right of appeal. Judicial review of the action of the state registrar may be had in accordance with the provisions of section 3-16-5, C.R.S. 1963, but an action for judicial review shall be commenced within sixty days after the date the state registrar gives his notice in writing of his decision. If no action for judicial review is commenced within said period, the state registrar shall return the certificate and all documents submitted in support thereof to the person submitting the same if registration of the certificate has been refused.

66-8-15. ALTERATION OF REPORTS AND CERTIFICATES; AMENDED REPORTS AND CERTIFICATES —

(1) No vital statistics report or certificate shall ever be altered in any way except in accordance with this article and applicable regulations. The date of alteration and a summary description of the evidence submitted in support of the alteration shall be endorsed on or made a part of each vital statistics certificate that is altered. Every vital statistics report or certificate that is altered in any way shall be marked "Amended" excepting the birth report or certificate of any illegitimate child altered by the addition of a father's name pursuant to section 66-8-12 (3), in which case, upon request of the parents, the surname of the child shall be changed on the report and certificate to that of the father, and also excepting additions and minor corrections made within one year after the date of the statistical event as may be specified by applicable regulations.

(2) Upon receipt of a certified copy of a court order changing the name of a person born in this state and upon request of such person, or upon the request of his parent, guardian, or legal representative if he be under a legal disability, the original certificate of birth shall be amended to reflect the new name thereon.

(3) In the event the state registrar alters a birth certificate or death certificate, he shall promptly

forward a certified copy of the altered certificate to the local registrar who holds a copy of the certificate as originally filed.

66-8-16. INSTITUTIONS TO KEEP RECORDS; PERSONS TO FURNISH INFORMATION—

(1) Every person in charge of an institution as defined in this article shall keep a record of personal particulars and date concerning each person admitted or confined to such institution. This record shall include such information as required by the standard certificate of birth, death, and fetal death forms issued under the provisions of this article. The record shall be made at the time of admission. The name and address of the person providing the information shall appear on the record.

(2) When a dead human body is released or disposed of by an institution, the person in charge of the institution shall record the name of the deceased, date of death, name and address of the person to whom the body is released, date of removal from the institution, or if finally disposed of by the institution, the date, place, and manner of disposition shall be recorded.

(3) Any person having knowledge of the facts shall furnish such information as he may possess regarding any birth, death, fetal death, adoption, marriage, or divorce, upon demand of the state registrar.

66-8-17. CERTIFIED COPIES FURNISHED—FEE —

Vital statistics records shall be treated as confidential, but the department of public health shall, upon request, furnish to any applicant having a direct and tangible interest in a vital statistics record a certified copy of any record registered under the provisions of this article. For the making and certification of such certified copy there shall be paid by the applicant a fee of two dollars, but no fee shall be paid for a certified copy given to another state agency. Any copy of the record of a birth or death, when properly certified by the department of public health to be a true copy thereof, shall be prima facie evidence in all courts and places of the facts therein stated. For any search of the files and records when no certified copy is made, there shall be paid by the applicant a fee of two dollars for each hour or fractional hour of time of search. The department of public health shall keep a correct account of all fees received by it under the provisions of this section, and turn the same over to the state treasurer to be credited to the general fund.

66-8-18. PENALTIES —

(1) Any person who knowingly and willfully makes any false statement in or supplies any false information for or for purposes of deception alters, mutilates, uses, attempts to use, or furnishes to another for deceptive use any vital statistics certificate and any person who knowingly and willfully and for purposes of deception uses or attempts to use or furnishes for use by another any vital statistics certificate knowing that such certificate contains false information or relates to a person other than the person with respect to whom it purports to relate shall be guilty of a misdemeanor and shall be punished by a fine of not more than one thousand dollars or

imprisoned not more than one year, or both.

(2) Any person who willfully violates any of the provisions of this article or refuses or neglects to perform any of the duties imposed upon him by this article shall be guilty of a misdemeanor and shall be punished by a fine of not more than one hundred dollars or imprisoned not more than thirty days or both.

66-8-19. TAX ON COURT ACTION AFFECTING VITAL STATISTICS -

In order to help defray the maintenance of vital statistics records there is hereby levied, in addition to the tax levied under section 135-4-29, C.R.S. 1963, a tax of one dollar upon each action for divorce, separate maintenance, annulment, paternity, adoption, legitimation, and change of name that is filed in the office of each clerk of a court of record in this state on or after the effective date of this section. Said tax shall be paid to such clerk at the time of the filing of such action by the party so filing the same, and shall be kept by said clerk in a separate fund and remitted to the state treasurer on the first day of each month for deposit to the state general fund.

Section 2. 37-13-4 (3), Colorado Revised Statutes 1963 (1965 Supp.), is amended to read:

37-13-4. ORIGINAL CIVIL JURISDICTION -

(3) The county court shall have concurrent original jurisdiction with the district court in petitions for change of name.

SEVERABILITY CLAUSE. -

SAFETY CLAUSE. -

EFFECTIVE DATE: January 1, 1968.

The following sections of the Colorado Revised Statutes, 1963 are pertinent to the laws covering Vital Statistics:

CHAPTER 35 ARTICLE 6

35-6-6. CORONER'S INQUEST - JURY - CERTIFICATE OF DEATH -

Whenever the coroner shall learn that any person in his jurisdiction has died from external violence from unexplained cause, or under suspicious circumstances, he shall: immediately notify the district attorney; proceed to view the body; and make all proper inquiry respecting the cause and manner of death.

The coroner shall, if he or the district attorney deem it advisable, cause a post mortem examination to be made, by a licensed physician, of the body of the deceased to determine the cause of death. When the coroner has knowledge that the body of any person who has died as above stated within his jurisdiction he may, if he deem it advisable, summon forthwith six citizens of the county to appear at a place named to hold an inquest to hear testimony and to make such inquiries that he deems appropriate. In all cases wherein the coroner shall have held an investigation or inquest the certificate of death shall be issued by the coroner or his deputy.

35-6-9. PHYSICIANS SUMMONED - COMPENSATION -

In any case wherein the coroner orders a post mortem examination he may summon one or more licensed physicians to make a scientific examination of the body of the deceased, and each such physician shall be allowed reasonable compensation for his services. The amount of such compensation shall be determined by the coroner within the limits prescribed by the county commissioners. Any person so summoned may rely on the coroner's act in ordering an examination, and it shall be legally presumed that he has acted with due legal authority.

CHAPTER 113 ARTICLE 1

113-1-12. PUBLIC RECORDS FREE TO SERVICEMEN -

Whenever a copy of any public record is required by the United States veterans administration or its successors or any other agency of the government of the United States, to be used in determining the eligibility of any person who shall have served in the armed forces of the United States or any dependent or dependents of such person, to participate in benefits for such person or persons made available by the laws of the United States in relation to such service in the armed forces of the United States, the official charged with the custody of such public records, without charge, shall provide the applicant or applicants for such benefits or any person acting on his or their behalf, or the representative of such bureau or other agency, with a certified copy of such record.

STATE LISTING

All fifty States of the Union were contacted and the information asked for was, briefly:

- (1) When did you start to file birth certificates?
- (2) When was the hour of birth item included on the forms?
- (3) What kind of time in this hour recorded in?
- (4) Has the above been standard practice since the inception of birth certificates, or were changes made through the years?
- (5) Please send a copy of the legislation regarding same.

Not all of the States answered this query. Some States which answered sent incomplete information. However, the material available is given in the listing below. If any of this information seems nebulous, you may send queries to the State Registrar, Bureau of Vital Statistics, at the State Capitol City in the State, or to the address given under the heading of the States listed below.

HEW: Year each State started to record birth certificates according to the U. S. Department of Health, Education, and Welfare, Washington, D.C.

ALABAMA —

Department of Public Health, State Office Bldg., Montgomery, AL 36104.

HEW: 1908.

Currently and for quite some years we have not included the time of day as a part of the birth certificate form. This item is included on death certificates. As to the "kind of time", it depends upon what kind of time is legal as of the date of the event. For example, during Daylight Saving Time months that is the time used. Otherwise the conventional time is used. There is no legislation pertaining to "kind of Time" used in recording vital events.

ALASKA —

Capitol, Juneau.

HEW: 1913.

No answer.

ARIZONA —

State Department of Health, Box 6820, Phoenix, AZ 85005.

HEW: 1909.

The only time daylight time has been used in the state of Arizona was in 1967. Otherwise we use standard time. We do not know what year all events show the time, although the records from 1909 have a place for this, many do not have this entered in the older records. We have no copies of any legislation on this matter and do not know if it would be included as such in any printings you could find.

ARKANSAS —

State Department of Health, 4815 W. Markham St., Little Rock, AR 72201.

HEW: 1914.

The hour of birth item has been included on certificates since the Bureau was established in 1914. Also, the time of birth is based on the time system being used, whether Central Standard or Daylight Saving

Time. The format of birth certificates is not determined by legislative action. Therefore, there is no documentation.

CALIFORNIA —

Department of Health, 744 "P" St., Sacramento, CA 95814.

HEW: 1905.

Generally, the recording of the time of the event has been provided for since 1905. However, some of the early certificate forms were provided by local jurisdictions and did not have a requirement for the reporting of the hour of the event. Suggest that you contact a law library in the specific area for information on laws pertaining to this matter.

COLORADO —

State Department of Health, 4210 E. 11th Ave., Denver, CO 80220.

HEW: 1907.

The hour of birth shown on birth certificates is the time in effect at the time of birth. During the summer months now, when daylight saving time is in effect, it is daylight time. During the winter months, it is standard time. We have no statutes pertaining to the time element of birth registration.

CONNECTICUT —

State Department of Health, 79 Elm St., Hartford, CT 06115.

HEW: 1897.

Statute pertaining to time: Sec. 1-6. Standard of time. The Standard of time for the seventy-fifth meridian west of Greenwich shall be the standard of time for this State, except that the standard of time of this state shall be one hour in advance of such established time from two o'clock ante meridian on the last Sunday in April until two o'clock ante meridian on the last Sunday in October. The year that the State of Connecticut has been recording the hours of birth began in 1933.

DELAWARE —

State Board of Health, Dover, DE 19901.

HEW: 1881.

On certificates of birth filed in the state of Delaware that time used as the time of birth is the prevailing time established by the Federal Government. As soon as Daylight Saving Time is adopted in the spring the time of birth is entered according to the Daylight Saving schedule. It is presumed that this has been going on ever since the use of Daylight Saving Time and at least for many years.

DISTRICT OF COLUMBIA —

Department of Public Health, 300 Indiana Ave., NW, Washington, DC 20001.

HEW: 1871.

Births are recorded as to the time of birth, be it standard or daylight at the time of birth. The hour of birth was first recorded in 1907. Our records start 1874.

FLORIDA —

Capitol, Tallahassee.

HEW: 1917.

No answer.

GEORGIA —

Department of Public Health, 47 Trinity Ave., Atlanta, GA 30334.

HEW: 1919.

Georgia did not begin recording vital events until 1919, and since that time has followed the kind of time (standard or daylight) as was in effect at the date of the vital event. The time of the event was shown on the regular certificate from the beginning of our vital records program in 1919 through June 1945 and from January 19, 1959 to the present date; however, during the period from July 19, 1945 through December 16, 1958, the time of the vital event was shown in the confidential medical section of the certificates.

HAWAII —

State Department of Health, P.O. Box 3378, Honolulu, HI 96801.

HEW: 1853.

Standard time is generally used in reckoning the time of occurrence in the preparation of vital records. Birth hours appear to have been recorded since July 1, 1909. No legislation specifically requires the entry of this time on birth certificates. This office generally follows the standard vital statistics forms recommended by the federal agency, the Division of Vital Statistics, National Center for Health Certificates, Public Health Service, Department of Health, Education and Welfare.

IDAHO —

Department of Health, Statehouse, Boise, ID 83707.

HEW: 1911.

Mountain Standard Time is used in Idaho for prepara-

tion of certificates. The hour of birth has not been included on birth certificates for many years. There is no legislation on this matter.

ILLINOIS —

Department of Public Health, Springfield, IL 62706.

HEW: 1916.

The hour of birth has been recorded on Illinois birth certificates ever since the state central registry was established in 1916. Prior to July 1, 1959, United States Standard Time was used in reckoning the date and time of occurrence in the preparation of official certificates of births, stillbirths and deaths, regardless of whether or not Daylight Saving Time, War Time, or any other advanced time, by whatever term known, was in effect.

On July 1, 1959, by Act of the General Assembly of the State of Illinois, the period between 2:00 a.m. on the last Sunday in April and 2:00 a.m. of the last Sunday in October, is known as State Standard Time, and is one hour in advance of the United States Standard Central Time. During the above period of time, the reckoning of the date and time of occurrence in the preparation of official vital records is on State Standard Time.

INDIANA —

State Board of Health, 1330 W. Michigan St., Indianapolis, IN 46206.

HEW: 1907.

The hour of occurrence of all vital events has been an item on the standard certificate of these events since the time of recording. This time is and was recommended by the United States Public Health Service; however each state may make its own decision. I am reasonably sure that this item appears on the certificate of all the registration areas.

The time is recorded in the legal time in that area at the time of the event. There are no statutes in this state dealing with "time". This item is covered by regulation which has the authority of law, without having been passed by the General Assembly of this State. The time of birth is considered confidential information (Chapter 157, Acts 1949) and may be released only by court order.

IOWA —

State Department of Health, Lucas State Office Bldg., Des Moines, IA 50319.

HEW: 1880.

The item pertaining to the hour of birth on birth certificates was first included on the forms about 1905. Hour is recorded in the prevailing time at the date of the event.

KANSAS —

State Department of Health, Topeka, KS 66601.

HEW: 1911.

The hour of occurrence of a vital event is registered on the basis of the official local time that's in effect at the time of each event, whether it be Standard or Daylight Time.

The hour of birth was recorded on Kansas Birth cer-

tificates from 1911 to 1948 but was not recorded from 1949 to 1967. Effective with the 1968 revision of the standard birth certificate the time of the hour of birth was restored, thus the information is currently being recorded.

The basic legislation regarding the content of a birth certificate is that included in K.S.A. 65-2415, which provides in part that, "The forms of certificates shall include as a minimum the items required by the national office of vital statistics subject to approval of and modification by the board." On this basis the Kansas certificate forms and registration procedures have always been in close conformity with the prescribed national standards.

KENTUCKY —

Capitol, Frankfort.

HEW: 1911.

No answer.

LOUISIANA —

Capitol, Baton Rouge.

HEW: 1914.

1790, New Orleans City Health Department.

No answer.

MAINE —

Department of Health and Welfare, Augusta, ME 04330.

HEW: 1892.

The kind of time used would be the prevailing time in effect at the time of the occurrence. No attempt would be made to convert from daylight to standard. Birth records established between 1892 and 1967 contain no provision for time (hour) of birth only date. Records established after January 1, 1968 have provision for hour of birth if the information is provided at time of filing. If not provided the record is accepted for filing provided date of birth is included.

MARYLAND —

Department of Health, 301 W. Preston St., Baltimore, MD 21201.

HEW: 1898.

1895, Baltimore City Health Department.

The hour of birth inserted on the birth certificate is the time of birth regardless of whether it is Daylight or Standard Time. The legality of this procedure is contained in Article 94, Section 3 of the Annotated Code of Maryland.

An item for the hour of birth has been contained in the Maryland birth certificates since 1914, at which time the standard size and format of the certificate was developed. Prior to 1914 the birth certificate was a 3" x 5" card and did not contain the hour of birth.

MASSACHUSETTS —

Secretary of Commonwealth, State House, Boston, MA 02133.

HEW: 1841.

The statutes do not provide that the time of birth be recorded on the birth record. After approximately 1943, the time has become a matter of record on birth certificates. Whatever the time of the year governs whether it be standard or daylight savings time.

MICHIGAN —

Capitol, Lansing.

HEW: 1867.

No answer.

MINNESOTA —

Department of Health, Minneapolis, MN 55440.

HEW: 1900.

This office did not begin receiving the original certificates until the year 1908 so our records from 1900 to 1907 are typed 3 x 5 cards containing information taken from the original certificates on file in the county offices. These copies do not contain the exact time of birth or death.

Beginning with 1908 all certificate forms contain a space in which to enter the exact time of the event. There is no legal requirement that this item be completed, therefore a certificate could be accepted by this office for filing if the space for the exact time was left blank.

We find, however, that a majority of the certificates received by this office do contain the exact time of birth or death and indicate whether or not the event occurred during Central Standard Time or Central Daylight Time.

MISSISSIPPI —

State Board of Health, Jackson, MS 39205.

HEW: 1912.

The time of day "hour" was placed on the birth certificates as an item as of November 1, 1912 and continued thereon until December 31, 1948, when new certificates were instituted. The time of birth was again placed on the certificates January 31, 1968, and will remain thereon until the need appears to have been satisfied for recording this item. The time of day "hour" is for the prevailing time when the event occurs.

MISSOURI —

Division of Health and Welfare, Jefferson, MO 65101.

HEW: 1910.

The time of the event has been requested on Missouri birth and death records since January 1, 1910. The time given is the official time in effect in the place where the event occurred.

MONTANA —

State Department of Health, Helena, MT 59601.

HEW: 1907.

The Montana death certificates have consistently

included an entry for hour of death. From 1919 through the middle of 1946, the Montana birth certificate contained an entry for hour of birth. The most recent revision of the Montana birth certificate which was placed in use January 1, 1968, also includes an item for hour of birth. The hour of birth would be entered in daylight time whenever this is in effect. No legislation regarding the entry of hour of birth.

NEBRASKA —

Department of Health, State House Station, Box 94757, Lincoln, NB 68509.

HEW: 1904.

In 1912 the standard birth certificate form was adopted and this provided space for the time of birth. Persons completing these certificates have been instructed to use the time in effect at the time of birth. This in some instances would have been daylight savings time when in use in Nebraska.

NEVADA —

Division of Health, Carson City, NV 89701.

HEW: 1911.

Birth hours have been put on Nevada birth certificates since July 1, 1911 when they were first centralized. The kind of time in effect would be the time on the record. No legislation on the matter.

NEW HAMPSHIRE —

Department of Health and Welfare, 61 S. Spring St., Concord, NH 03301.

HEW: all recorded.

Our records of vital events are recorded by date according to the time schedule in use at the time of the event; either eastern standard time or daylight time. Exact hour of an event has been on the birth and death certificate since 1937. Prior to 1937, hour of birth and death was not collected as a standard practice. No legislation. Items to be included on the certificates are recommended by formerly the State Board of Health and now by the State Registrar.

NEW JERSEY —

Department of Health, P.O. Box 1540, Trenton, NJ 08625.

HEW: 1848.

An item calling for the insertion of hour of birth first appeared on our report form in 1920. However, this is not to say that the item has always been completed. We do not query if it has been omitted.

The only item in this office concerning time is a copy of the Attorney General's letter of July 7, 1921. "If standard time is not the time stated, the record should disclose what method of calculation of the time has been used to locate the event referred to."

NEW MEXICO —

Capitol, Santa Fe.

HEW: all recorded.

No answer.

NEW YORK —

Capitol, Albany.

HEW: 1880.

NYC Burroughs, various dates.

No answer.

NORTH CAROLINA —

State Board of Health, Box 2091, Raleigh, NC 27602.

HEW: 1913.

The time used is that which is in effect at the time of occurrence.

NORTH DAKOTA —

State Department of Health, Division of Vital Statistics, Bismarck, ND 58501.

HEW: 1908.

It has been customary for the persons to prepare certificates using the time in effect in the community when the certificate was prepared. The certificates in this state have been patterned after the recommended standard form, and since registration years ago did not receive the same emphasis as in recent years, there can be no guarantee of the accuracy with which certificates were completed.

OHIO —

Department of Health, P.O. Box 118, Columbus, OH 43216.

HEW: 1908.

Records of birth began December 20, 1908. The certificates contained the time of birth occurred in 1908 through 1955. The years 1956 through 1967 do not contain the time the birth occurred. Beginning with the year 1968 the certificates again indicate the time the birth occurred.

The certificates do not indicate whether it was standard or daylight time. The time used to reckon the time of occurrence I believe would be the time used at the time of the birth. In most cases this would be standard time since the State of Ohio did not adopt daylight saving time as a state until the year 1968.

OKLAHOMA —

Division of Vital Statistics, State Department of Health, Oklahoma City, OK 73105.

HEW: 1908.

Birth certificates have been issued since October, 1908, and the time of birth is shown if the doctor recorded same when delivering a child. Delayed certificates of birth do not show time of birth.

OREGON —

State Board of Health, State Office Bldg., P.O. Box 231, Portland, OR 97207.

HEW: 1903.

This item (time of birth) has appeared on Oregon birth certificates from the early 1900's to the present date. Of course, on individual records this item may not be completed. The kind of time recorded (Standard or Daylight) is the official time in effect in the place of birth at the time of the child's birth.

PENNSYLVANIA —

Department of Health, P.O. Box 90, Harrisburg, PA 17120.

HEW: 1906.

Original records of births and deaths in Pennsylvania have been filed with the state since January, 1906.

Standard time has always been used in recording the time of birth. A space for the hour of birth has always been on the record. To the best of our knowledge there is no legislation on this subject.

RHODE ISLAND —

Department of Health, Providence, RI 02903

HEW: 1852.

The time of birth has been recorded on birth records from 1933 to 1956 and from 1961 through the present. Time is recorded in accordance with the local time being used.

SOUTH CAROLINA —

State Board of Health, L. Marion Sims Bldg., Columbia, SC 29201.

HEW: 1915.

The law requiring the filing of birth records in South Carolina became effective January 1, 1915. The hour of birth has been a standard item since that time. The hour of birth recorded according to standard or daylight, whichever is in existence at that particular time.

SOUTH DAKOTA, —

Capitol, Pierre.

HEW: 1906.

No answer.

TENNESSEE —

Department of Public Health, Nashville, TN 37219.

HEW: 1914.

The time used in preparing certificates of birth and other actual records is the time that was in effect when the event occurred. Space has been provided on birth certificates for recording the hour since 1914.

TEXAS —

State Department of Health, Austin, TX 78701.

HEW: 1903.

The first law requiring the registration of births in Texas was passed in 1903; however, it was not until 1917 that the standard form for registering births included an item calling for the hour of birth. Depending upon which is in effect, Standard and Daylight Saving Time are both used in determining the hour of birth as reflected in birth certificates. We have no specific statutory or regulatory measure relative to the hour of birth entry on birth certificates.

UTAH —

Department of Health, Salt Lake City, UT 84111.

HEW: 1905.

Our records have the time of birth since 1905 when

our records began. At that time we were on standard time but at the present we are on daylight savings time and the birth is recorded according to the time the state is on.

VERMONT —

Secretary of State, Montpelier, VT 05602.

HEW: all recorded.

The hour of birth was recorded on birth records about 1919 and this information would be found in the various Town and City Clerks' offices where the births were recorded. However, the records returned to this office didn't require the information until 1953 so the hour of birth from 1919 through 1953 is not on the birth records in this office. The hour was the kind of time in effect in the locality.

VIRGINIA —

Department of Health, P.O. Box 1000, Richmond, VA 23208.

HEW: 1912.

The time of birth has been shown on birth certificates since June 14, 1912. However, we have no way of knowing whether this would be Standard Time. We would assume that it would be the time that was being used in the locality at the time of the birth.

WASHINGTON —

Department of Health, Public Health Bldg., Olympia, WA 98501.

HEW: 1907.

Hour of birth appeared on the birth certificate forms in use from 1907 through 1948. The item was dropped from the form through 1967 and was re-established on the forms that went into use January 1, 1968. As for reckoning date and time by standard or daylight time, the instructions have been that the time in effect in the area where the event occurred should be used. There is no specific legislation relative to this matter.

WEST VIRGINIA —

Capitol, Charleston.

HEW: 1917.

No answer.

WISCONSIN —

Capitol, Madison.

HEW: 1814.

No answer.

WYOMING —

Department of Public Health, State Office Bldg., Cheyenne, WY 82001.

HEW: 1909.

The time of birth has been recorded on birth certificates since compulsory registration went into effect. The certificates do not reflect whether or not Daylight Savings Time is used in determining the date and time of occurrence. The time used is whatever time is in effect at the time of birth.

It should be mentioned that the previous information came from the State Registrars' office. Records at each community may be more complete and should be checked if doubt arises as to some item in the record of the event. Some States require a court order, a specified reason, or the native's own request to release information on vital events. Furthermore, the hour item is sometimes kept in a confidential medical section of the records. Other sources where the hour item may be found are the hospital records or the attending doctor's records.
